

# WILSON CASE GAGE - 6MM DASHER CASE GAGE

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

The most important use of a cartridge case gage is for setting up 7/8"-14 press type full length resizing dies. A common error in reloading is to oversize your brass. Headspace of fired cases can quickly and accurately be measured using this tool and a caliper. Regular Style: This one piece gage will check overall length to indicate a need for trimming and datum to head length to assure correct headspace to prevent over sizing. Adjustable Style: For belted mags. While the belt provides support for proper headspace, the life of the case will drastically shorten unless resizing is held to a minimum at the shoulder.  
SPECIAL ORDER CASE GAGES ARE AVAILABLE---MEASURE CASE LENGTH ONLY

## Attributes

- Name: [6MM DASHER CASE GAGE](#)
- Manufacturer: [L.E. WILSON](#)
- Product no.: 749003847

## Safety Instruction Guide

### Introduction

Thank you for choosing the WILSON CASE GAGE 6MM DASHER CASE GAGE. This product is designed to assist in setting up resizing dies and measuring headspace accurately. To ensure your safety and the effective use of this product, please read the following safety instructions and guidelines carefully.

### General Safety Guidelines

- **Product Safety:** This product complies with EU regulations to ensure safe use. Always handle with care.
- **Enhanced Recalls:** Stay informed about product recalls. Check for updates regularly.
- **Online Shopping:** If purchased online, ensure that the seller meets safety requirements.
- **Special Consumer Focus:** This product is not intended for use by children. Keep out of reach of minors.
- **EU Contact Point:** For safety inquiries, please refer to the manufacturer's contact information provided at the point of purchase.
- **Rapid Alerts:** Monitor the EU's Safety Gate platform for any alerts regarding this product.

### Specific Safety Precautions for Use

- **Avoid Oversizing:** Be cautious not to oversize your brass when using the gage.
- **Use Proper Tools:** Always use a caliper in conjunction with the gage for accurate measurements.
- **Inspect Regularly:** Check the gage for any signs of wear or damage before each use.
- **Follow Instructions:** Adhere strictly to the setup and usage instructions to avoid accidents.
- **Store Safely:** Keep the gage in a safe place, away from moisture and extreme temperatures.

### Instructions for Installation and Usage

#### 1. Setting Up the Gage:

- Ensure that your workspace is clean and welllit.
- Gather all necessary tools, including the WILSON CASE GAGE and a caliper.

#### 2. Measuring Headspace:

- Insert the fired case into the gage.
- Use the caliper to measure the headspace accurately.
- Ensure that the overall length is within the acceptable range to avoid the need for trimming.

#### 3. Using the Adjustable Style (For belted mags):

- Confirm that the belt is intact and provides support for proper headspace.
- Minimize resizing at the shoulder to prolong the life of the case.

#### 4. Regular Maintenance:

- Clean the gage after each use to prevent dirt and debris buildup.
- Store the gage in a protective case to avoid damage.

### Disposal Instructions

- Dispose of any damaged or unusable parts in accordance with local regulations.

- Recycle packaging materials when possible.

## **Contact Information for Further Support**

For any inquiries related to safety or product support, please refer to the manufacturer's contact information available at the point of purchase.

Thank you for your attention to these safety guidelines. Your safety and satisfaction are our top priority.
