

# WILSON CASE GAGE - 35 WHELEN CASE GAGE

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

The most important use of a cartridge case gage is for setting up 7/8"-14 press type full length resizing dies. A common error in reloading is to oversize your brass. Headspace of fired cases can quickly and accurately be measured using this tool and a caliper. Regular Style: This one piece gage will check overall length to indicate a need for trimming and datum to head length to assure correct headspace to prevent over sizing. Adjustable Style: For belted mags. While the belt provides support for proper headspace, the life of the case will drastically shorten unless resizing is held to a minimum at the shoulder. SPECIAL ORDER CASE GAGES ARE AVAILABLE---MEASURE CASE LENGTH ONLY

## Attributes

- Name: [35 WHELEN CASE GAGE](#)
- Manufacturer: [L.E. WILSON](#)
- Product no.: 749003857
- Mfr. No.: CG-35WLN
- Cartridge: 35 Whelen
- Delivery weight: 0.204kg
- Shipping height: 30mm
- Shipping width: 36mm
- Shipping length: 86mm
- UPC: 857949005715

## Safety Instructions

### Introduction

Thank you for choosing the WILSON CASE GAGE 35 WHELEN CASE GAGE. This tool is designed to assist in the setup and measurement of cartridge cases for reloading. It is essential to use this product safely and correctly to ensure optimal performance and safety.

### General Safety Guidelines

- Always read and understand the instructions before using the product.
- Ensure the gage is in good condition before use; do not use if damaged.
- Keep the gage out of reach of children and pets.
- Use the gage only for its intended purpose as described in this manual.
- Regularly check for any recalls or safety updates regarding this product on the EU's Safety Gate platform.

### Specific Safety Precautions for Use

- **Headspace Measurement:** When measuring headspace, ensure that the gage is properly aligned with the case to avoid inaccurate readings.
- **Oversizing Prevention:** Be cautious to prevent oversizing of brass, which can lead to dangerous malfunctions.
- **Adjustable Style Usage:** For belted magnum cases, minimize resizing at the shoulder to prolong case life.
- **Caliper Use:** When using a caliper in conjunction with the gage, ensure that it is calibrated correctly for accurate measurements.

### Instructions for Installation and Usage

#### 1. Setting Up the Gage:

- Place the gage on a stable, flat surface.
- Ensure the area is free from obstructions and distractions.

#### 2. Measuring the Cartridge Case:

- Insert the cartridge case into the gage.
- Check the overall length and datum to head length.
- If trimming is needed, proceed carefully to avoid excessive removal of material.

#### 3. Using the Caliper:

- Use a caliper to measure the headspace of fired cases accurately.
- Ensure the caliper jaws are clean and free from debris before measurement.

#### 4. Regular Maintenance:

- Clean the gage after each use to maintain its accuracy.
- Store the gage in a dry place to prevent rust or damage.

## **Disposal Instructions**

- Dispose of any damaged or unusable gages in accordance with local regulations.
- Do not dispose of in regular household waste. Check for local recycling or hazardous waste programs.

## **Contact Information for Further Support**

For any inquiries regarding the safety and use of the WILSON CASE GAGE 35 WHELEN CASE GAGE, please refer to the contact information provided on the product packaging or visit our website for more information.

By following these guidelines, you can ensure safe and effective use of the WILSON CASE GAGE 35 WHELEN CASE GAGE. Always prioritize safety and stay informed about best practices in reloading. Thank you for your attention to these important safety instructions.
