

WILSON CASE GAGE - L.E. WILSON 357 SIG CASE GAGE

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

The most important use of a cartridge case gage is for setting up 7/8"-14 press type full length resizing dies. A common error in reloading is to oversize your brass. Headspace of fired cases can quickly and accurately be measured using this tool and a caliper. Regular Style: This one piece gage will check overall length to indicate a need for trimming and datum to head length to assure correct headspace to prevent over sizing. Adjustable Style: For belted mags. While the belt provides support for proper headspace, the life of the case will drastically shorten unless resizing is held to a minimum at the shoulder. SPECIAL ORDER CASE GAGES ARE AVAILABLE---MEASURE CASE LENGTH ONLY

Attributes

- Name: [L.E. WILSON 357 SIG CASE GAGE](#)
- Manufacturer: [L.E. WILSON, INC.](#)
- Product no.: 749003929
- Mfr. No.: CG-357S
- Cartridge: 357 SIG
- Delivery weight: 0.091kg
- Shipping height: 36mm
- Shipping width: 36mm
- Shipping length: 84mm
- UPC: 857949005111

WILSON CASE GAGE Safety Instruction Guide

Introduction

Thank you for choosing the WILSON CASE GAGE for your reloading needs. This guide provides essential safety instructions to ensure the safe and effective use of the product. Please read this guide carefully before using the gage.

General Safety Guidelines

- Ensure that the product is used only for its intended purpose as outlined in this guide.
- Always handle the gage with care to avoid any injuries.
- Keep the gage out of reach of children and vulnerable individuals.
- Regularly inspect the gage for any signs of damage or wear. Do not use if damaged.
- Follow all local laws and regulations regarding ammunition reloading.

Specific Safety Precautions for Use

- **Avoid Oversizing:** Use the gage to check the headspace of fired cases. Oversizing can lead to unsafe ammunition.
- **Caliper Use:** When measuring headspace, use a reliable caliper to ensure accurate readings.
- **Belted Magnums:** For belted magnums, ensure that resizing at the shoulder is minimized to prolong case life.
- **Trimming Guidelines:** Check overall length using the onepiece gage to determine if trimming is necessary.
- **Special Order Cases:** Be aware that special order case gages are available for measuring case length only.

Instructions for Installation and Usage

1. Setup:

- Ensure your reloading press is securely mounted and stable.
- Gather all necessary tools, including the WILSON CASE GAGE and a caliper.

2. Using the Gage:

- Insert the fired case into the gage.
- Check the overall length and headspace using the gage and caliper.
- If the case exceeds the acceptable length, trim it accordingly.
- For belted magnums, ensure the resizing is minimal at the shoulder to maintain case integrity.

3. After Use:

- Clean the gage to remove any debris or residue.
- Store the gage in a safe, dry place to prevent damage.

Disposal Instructions

- Dispose of any unusable or damaged cases in accordance with local regulations.
- Do not dispose of the gage in regular household waste. Follow local guidelines for electronic waste disposal if applicable.

Contact Information for Further Support

For safety inquiries or further information regarding the WILSON CASE GAGE, please refer to the official contact points provided by the manufacturer.

Conclusion

By following these safety instructions, you can ensure the safe and effective use of the WILSON CASE GAGE. Always prioritize safety and adhere to the guidelines provided. Thank you for your attention to these important safety practices.
