

WILSON CASE GAGE - L.E. WILSON 17 REMINGTON CASE GAGE

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

The most important use of a cartridge case gage is for setting up 7/8"-14 press type full length resizing dies. A common error in reloading is to oversize your brass. Headspace of fired cases can quickly and accurately be measured using this tool and a caliper. Regular Style: This one piece gage will check overall length to indicate a need for trimming and datum to head length to assure correct headspace to prevent over sizing. Adjustable Style: For belted mags. While the belt provides support for proper headspace, the life of the case will drastically shorten unless resizing is held to a minimum at the shoulder. SPECIAL ORDER CASE GAGES ARE AVAILABLE---MEASURE CASE LENGTH ONLY

Attributes

- Name: [L.E. WILSON 17 REMINGTON CASE GAGE](#)
- Manufacturer: [L.E. WILSON](#)
- Product no.: 749003931

WILSON CASE GAGE L.E. WILSON 17 REMINGTON CASE GAGE Safety Instructions

Introduction

Thank you for choosing the WILSON CASE GAGE L.E. WILSON 17 REMINGTON CASE GAGE. This guide provides essential safety instructions to ensure the safe and effective use of your case gage. Please read this guide carefully and keep it for future reference.

General Safety Guidelines

- Ensure that you are familiar with the proper use of the case gage before attempting to use it.
- Always use the case gage in a welllit and organized workspace.
- Keep the case gage out of reach of children and unauthorized users.
- Inspect the case gage regularly for any signs of damage or wear. Do not use if damaged.
- Follow all instructions and guidelines provided in this manual to avoid accidents or injuries.
- Report any unsafe products or accidents to the appropriate authorities.

Specific Safety Precautions for Use

- Use the case gage only for its intended purpose: measuring the overall length and headspace of 17 Remington cartridge cases.
- Avoid using excessive force when measuring cases. This can lead to inaccurate measurements and potential damage to the gage.
- When using a caliper in conjunction with the case gage, ensure that the caliper is calibrated and functioning correctly.
- Do not attempt to modify or alter the case gage in any way.
- If you are unsure about any aspect of using the case gage, seek advice from a knowledgeable individual or professional.

Instructions for Installation and Usage

1. Setting Up the Case Gage:

- Place the case gage on a stable, flat surface.
- Ensure that the gage is clean and free from debris.

2. Measuring Cartridge Cases:

- Insert the cartridge case into the gage until it is fully seated.
- Check the overall length of the case using the gage indicators.
- If the case length exceeds the recommended specifications, trimming is necessary.
- Measure the headspace using a caliper for accurate results.

3. Adjustable Style Usage (for belted mags):

- When using the adjustable style case gage, ensure that the belt is properly aligned for accurate headspace measurement.
- Minimize resizing at the shoulder to prolong the life of the cartridge case.

4. PostUse Care:

- After use, clean the case gage with a soft cloth to remove any residue.

- Store the case gage in a safe, dry place away from moisture and contaminants.

Disposal Instructions

- When the case gage reaches the end of its life or is no longer usable, dispose of it in accordance with local regulations.
- Do not dispose of the case gage in regular household waste. Check for local recycling programs or hazardous waste disposal options.

Contact Information for Further Support

For any safety inquiries or further support regarding the WILSON CASE GAGE L.E. WILSON 17 REMINGTON CASE GAGE, please refer to the contact information provided on the product packaging or visit the manufacturer's website. Your safety and satisfaction are our top priorities.

Thank you for your attention to these safety instructions, and enjoy your reloading experience with the WILSON CASE GAGE.
