

WILSON CASE GAGE - L.E. WILSON 25-06 REMINGTON CASE GAGE

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

The most important use of a cartridge case gage is for setting up 7/8"-14 press type full length resizing dies. A common error in reloading is to oversize your brass. Headspace of fired cases can quickly and accurately be measured using this tool and a caliper. Regular Style: This one piece gage will check overall length to indicate a need for trimming and datum to head length to assure correct headspace to prevent over sizing. Adjustable Style: For belted mags. While the belt provides support for proper headspace, the life of the case will drastically shorten unless resizing is held to a minimum at the shoulder.
SPECIAL ORDER CASE GAGES ARE AVAILABLE---MEASURE CASE LENGTH ONLY

Attributes

- Name: [L.E. WILSON 25-06 REMINGTON CASE GAGE](#)
- Manufacturer: [L.E. WILSON](#)
- Product no.: 749003937
- Mfr. No.: CG-2506
- Cartridge: 25-06 Remington
- Delivery weight: 0.227kg
- Shipping height: 33mm
- Shipping width: 36mm
- Shipping length: 86mm
- UPC: 857949005470

WILSON CASE GAGE Safety Instruction Guide

Introduction

Thank you for choosing the WILSON CASE GAGE for your reloading needs. This guide provides important safety information and instructions to ensure the safe and effective use of this product. Please read this guide carefully before use.

General Safety Guidelines

- Ensure that the product is used in accordance with the manufacturer's instructions.
- Always inspect the gage before use to check for any signs of damage or wear.
- Keep the gage and all reloading equipment out of reach of children.
- Use the gage in a welllit and clean workspace to avoid accidents.
- Be aware of the potential hazards associated with reloading ammunition, including the handling of primers and powders.

Specific Safety Precautions for Use

- **Avoid Oversizing:** When using the gage, be cautious not to oversize your brass. This can lead to safety issues during firing.
- **Check Headspace:** Regularly measure headspace to ensure proper fitting of cartridges. Incorrect headspace can lead to dangerous malfunctions.
- **Use Proper Tools:** Always use a caliper in conjunction with the gage for accurate measurements.
- **Handle with Care:** Treat the gage with care to prevent damage. Avoid dropping or mishandling the tool.
- **Follow Manufacturer Guidelines:** Adhere strictly to the guidelines provided by L.E. WILSON, INC. for best practices.

Instructions for Installation and Usage

1. Setting Up the Gage:

- Ensure that the gage is clean and free of debris.
- Place the gage on a stable surface.

2. Measuring Overall Length:

- Insert the cartridge case into the gage.
- Use a caliper to measure the overall length. If the length exceeds specifications, trimming is necessary.

3. Checking Headspace:

- Place the fired cartridge case into the gage.
- Measure the datum to head length to ensure correct headspace.
- If the measurement is outside the acceptable range, do not use the case until it is resized properly.

4. Adjustable Style Use:

- For belted magnums, ensure that the belt provides adequate support for headspace.
- Minimize resizing at the shoulder to prolong the life of the case.

5. Final Checks:

- After measuring, remove the cartridge case from the gage.

- Store the gage in a safe place away from moisture and extreme temperatures.

Disposal Instructions

- Dispose of any damaged or unusable gages according to local regulations.
- Do not throw the gage in regular household waste if it is made of materials that require special disposal.

Contact Information for Further Support

- For safety inquiries or further support, please refer to the manufacturer's contact information provided with the product packaging or visit the official website.

Conclusion

By following these safety instructions and guidelines, you can ensure the safe and effective use of the WILSON CASE GAGE. Always prioritize safety when reloading ammunition and handling tools. Thank you for your attention to these important safety measures.
