

# WILSON CASE GAGE - L.E. WILSON 257 ROBERTS CASE GAGE

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

The most important use of a cartridge case gage is for setting up 7/8"-14 press type full length resizing dies. A common error in reloading is to oversize your brass. Headspace of fired cases can quickly and accurately be measured using this tool and a caliper. Regular Style: This one piece gage will check overall length to indicate a need for trimming and datum to head length to assure correct headspace to prevent over sizing. Adjustable Style: For belted mags. While the belt provides support for proper headspace, the life of the case will drastically shorten unless resizing is held to a minimum at the shoulder. SPECIAL ORDER CASE GAGES ARE AVAILABLE---MEASURE CASE LENGTH ONLY

## Attributes

- Name: [L.E. WILSON 257 ROBERTS CASE GAGE](#)
- Manufacturer: [L.E. WILSON](#)
- Product no.: 749003938
- Mfr. No.: CG-257R
- Cartridge: 257 Roberts
- Delivery weight: 0.181kg
- Shipping height: 30mm
- Shipping width: 36mm
- Shipping length: 84mm
- UPC: 857949005531

# WILSON CASE GAGE Safety Instructions

## Introduction

Thank you for choosing the WILSON CASE GAGE for your reloading needs. This guide provides important safety instructions to ensure the proper and safe use of your case gage. Please read this document carefully before using the product.

## General Safety Guidelines

- Ensure safe use of the WILSON CASE GAGE by following all instructions provided in this manual.
- Be aware of potential risks associated with reloading and handling ammunition components.
- Regularly check for any updates or recalls regarding this product through the EU's Safety Gate platform.
- If you are a vulnerable group member, such as a child, ensure adult supervision when using this product.
- Report any unsafe products or incidents to your local authorities immediately.

## Specific Safety Precautions for Use

- Always inspect the case gage for any damage before use. Do not use if damaged.
- Keep the case gage out of reach of children.
- Use the case gage only for the intended purpose of measuring cartridge cases.
- Avoid using excessive force when measuring to prevent damage to the gage or injury.
- Wear appropriate safety gear, such as safety glasses, when reloading.
- Ensure your workspace is clean and free of distractions to maintain focus.

## Instructions for Installation and Usage

### 1. Setting Up the Case Gage

- Remove the WILSON CASE GAGE from its packaging.
- Ensure the gage is clean and free of any debris before use.

### 2. Using the Regular Style Gage

- Insert the cartridge case into the gage.
- Check the overall length to determine if trimming is necessary.
- Measure the datum to head length to ensure correct headspace.

### 3. Using the Adjustable Style Gage

- For belted magnum cartridges, adjust the gage as needed.
- Insert the cartridge case into the gage.
- Confirm that the belt provides proper support for headspace.

### 4. Measuring Headspace

- Use a caliper to measure the headspace of fired cases accurately.
- Compare measurements against recommended specifications for your specific cartridge.

### 5. After Use

- Clean the gage after each use to maintain its accuracy and longevity.
- Store the gage in a safe, dry place away from children.

## **Disposal Instructions**

- Dispose of the WILSON CASE GAGE according to local regulations.
- If the gage is damaged beyond repair, consider recycling materials where possible.

## **Contact Information for Further Support**

For any inquiries or concerns regarding the WILSON CASE GAGE, please refer to the product packaging for contact details or consult your retailer. Ensure you have your product information ready for any support needed.

By following these safety instructions, you can ensure a safe and effective reloading experience with your WILSON CASE GAGE. Thank you for your attention to these important guidelines.
