

WILSON CASE GAGE - L.E. WILSON 280 REMINGTON CASE GAGE

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

The most important use of a cartridge case gage is for setting up 7/8"-14 press type full length resizing dies. A common error in reloading is to oversize your brass. Headspace of fired cases can quickly and accurately be measured using this tool and a caliper. Regular Style: This one piece gage will check overall length to indicate a need for trimming and datum to head length to assure correct headspace to prevent over sizing. Adjustable Style: For belted mags. While the belt provides support for proper headspace, the life of the case will drastically shorten unless resizing is held to a minimum at the shoulder. SPECIAL ORDER CASE GAGES ARE AVAILABLE---MEASURE CASE LENGTH ONLY

Attributes

- Name: [L.E. WILSON 280 REMINGTON CASE GAGE](#)
- Manufacturer: [L.E. WILSON, INC.](#)
- Product no.: 749003939
- Mfr. No.: CG-280R
- Cartridge: 280 Remington
- Delivery weight: 0.227kg
- Shipping height: 30mm
- Shipping width: 36mm
- Shipping length: 86mm
- UPC: 857949005555

WILSON CASE GAGE Safety Instruction Guide

Introduction

Thank you for choosing the WILSON CASE GAGE for your reloading needs. This guide aims to provide you with essential safety information to ensure the safe and effective use of this product. Please read through this document carefully and keep it for future reference.

General Safety Guidelines

- Ensure that you are familiar with the operation of your reloading press and dies before using the case gage.
- Always use the case gage in a welllit and safe environment.
- Keep the case gage out of reach of children and vulnerable individuals.
- Regularly inspect the case gage for any signs of wear or damage before use.
- Use the case gage only for its intended purpose as described in this guide.

Specific Safety Precautions for Use

- **Avoid Oversizing:** When using the case gage, ensure that you are not oversizing your brass, as this can lead to dangerous malfunctions.
- **Proper Measurement:** Use a caliper to accurately measure the headspace of fired cases. Incorrect measurements can lead to unsafe reloading practices.
- **Adjustable Style Caution:** If using the adjustable style for belted magnums, be aware that resizing should be minimized at the shoulder to prolong the life of the case.
- **Special Order Cases:** If using special order case gages, ensure you measure case length only, as improper use can lead to inaccuracies.

Instructions for Installation and Usage

1. Setting Up the Gage:

- Ensure the gage is clean and free from debris.
- Attach the case gage securely to your reloading press.

2. Measuring Cases:

- Insert the fired case into the gage.
- Use a caliper to measure the headspace and overall length.
- If the case exceeds acceptable limits, trim it to the correct size.

3. Adjusting the Gage (for Adjustable Style):

- Follow the manufacturer's instructions for adjusting the gage.
- Ensure that the adjustment is secure before using the gage.

4. PostUsage Care:

- After use, clean the gage to remove any residue.
- Store the gage in a safe, dry place to prevent damage.

Disposal Instructions

- Dispose of any damaged or wornout components of the case gage in accordance with local regulations.

- Do not dispose of the gage in regular household waste if it is still functional; consider donating it or recycling it through proper channels.

Contact Information for Further Support

For any questions or concerns regarding the WILSON CASE GAGE, please refer to the manufacturer's contact information included with your product packaging. It is important to reach out to them for any safety inquiries or support you may need.

Conclusion

By following the guidelines and instructions provided in this safety instruction guide, you can ensure a safe and effective experience with your WILSON CASE GAGE. Always prioritize safety and be aware of the potential hazards associated with reloading. Thank you for your attention to these important safety measures.
