

WILSON CASE GAGE - L.E. WILSON 6.5X55MM SWEDE CASE GAGE

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

The most important use of a cartridge case gage is for setting up 7/8"-14 press type full length resizing dies. A common error in reloading is to oversize your brass. Headspace of fired cases can quickly and accurately be measured using this tool and a caliper. Regular Style: This one piece gage will check overall length to indicate a need for trimming and datum to head length to assure correct headspace to prevent over sizing. Adjustable Style: For belted mags. While the belt provides support for proper headspace, the life of the case will drastically shorten unless resizing is held to a minimum at the shoulder. SPECIAL ORDER CASE GAGES ARE AVAILABLE---MEASURE CASE LENGTH ONLY

Attributes

- Name: [L.E. WILSON 6.5X55MM SWEDE CASE GAGE](#)
- Manufacturer: [L.E. WILSON](#)
- Product no.: 749003943
- Mfr. No.: CG-6555
- Cartridge: 6.5 x 55 mm Swedish Mauser
- Delivery weight: 0.181kg
- Shipping height: 28mm
- Shipping width: 33mm
- Shipping length: 89mm
- UPC: 857949005791

WILSON CASE GAGE Safety Instruction Guide

Introduction

Thank you for choosing the WILSON CASE GAGE for your reloading needs. This guide provides essential safety instructions to ensure the safe and effective use of the product. Please read this guide carefully before using the case gage to prevent accidents and ensure optimal performance.

General Safety Guidelines

- Ensure that the WILSON CASE GAGE is used only for its intended purpose.
- Always inspect the gage for any damage before use. Do not use if damaged.
- Keep the gage out of reach of children and unauthorized users.
- Use the gage in a welllit and organized workspace to minimize risks.
- Wear appropriate safety gear, such as safety glasses, when handling reloading equipment.

Specific Safety Precautions for Use

- **Handling:** Always handle the gage with care. Avoid dropping or striking it against hard surfaces.
- **Measurement:** When measuring, ensure the gage is clean and free of debris to avoid inaccurate readings.
- **Calibration:** Regularly check the calibration of the gage to ensure accurate measurements.
- **Oversizing:** Be cautious of oversizing your brass. Use the gage to measure headspace accurately and prevent this issue.
- **Adjustable Style:** If using the adjustable style for belted mags, ensure that resizing is minimized at the shoulder to extend the life of the case.

Instructions for Installation and Usage

1. Setup:

- Place the WILSON CASE GAGE on a stable surface.
- Ensure that the gage is clean and free from any obstructions.

2. Measuring Cartridge Cases:

- Insert the cartridge case into the gage.
- Use a caliper to measure the headspace and overall length.
- Compare the measurements with the specifications for your cartridge to determine if trimming is necessary.

3. Adjusting for Belted Mags:

- If using the adjustable style, carefully adjust the gage to accommodate the belt.
- Make sure the adjustment does not compromise the gage's integrity.

4. PostUse Care:

- After use, clean the gage to remove any brass shavings or debris.
- Store the gage in a safe place to prevent damage.

Disposal Instructions

- Dispose of the WILSON CASE GAGE according to local regulations for metal products.

- Do not dispose of the gage in regular household waste. Check for recycling options in your area.

Contact Information for Further Support

For questions regarding the WILSON CASE GAGE, please refer to the manufacturer's website or contact the retailer from whom you purchased the product.

Conclusion

By following these safety instructions and guidelines, you can ensure the effective and safe use of the WILSON CASE GAGE. Always prioritize safety and stay informed about the proper handling of reloading tools. Thank you for your attention to these important safety measures.
