

WILSON CASE GAGE - 7MM-08 REMINGTON CASE GAGE

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

The most important use of a cartridge case gage is for setting up 7/8"-14 press type full length resizing dies. A common error in reloading is to oversize your brass. Headspace of fired cases can quickly and accurately be measured using this tool and a caliper. Regular Style: This one piece gage will check overall length to indicate a need for trimming and datum to head length to assure correct headspace to prevent over sizing. Adjustable Style: For belted mags. While the belt provides support for proper headspace, the life of the case will drastically shorten unless resizing is held to a minimum at the shoulder. SPECIAL ORDER CASE GAGES ARE AVAILABLE---MEASURE CASE LENGTH ONLY

Attributes

- Name: [7MM-08 REMINGTON CASE GAGE](#)
- Manufacturer: [L.E. WILSON](#)
- Product no.: 749003945

WILSON CASE GAGE 7MM08 REMINGTON CASE GAGE

Safety Instruction Guide

Introduction

Thank you for choosing the WILSON CASE GAGE 7MM08 REMINGTON CASE GAGE. This tool is essential for ensuring the accurate resizing of cartridge cases, thereby enhancing your reloading experience. This guide provides important safety information to ensure the safe and effective use of the product in compliance with the EU General Product Safety Regulation (GPSR).

General Safety Guidelines

- Always read and understand the safety instructions before using the product.
- Ensure the working area is clean, dry, and welllit.
- Keep the tool out of reach of children and vulnerable individuals.
- Use the product only for its intended purpose as described.
- Regularly inspect the tool for any signs of wear or damage before use.
- Report any unsafe conditions or product defects to the appropriate authorities.
- Stay informed about recalls or safety alerts related to this product through the EU's Safety Gate platform.

Specific Safety Precautions for Use

- **Hazard Identification:**
 - Improper use may lead to injury or damage to the tool.
 - Oversizing brass can lead to malfunctioning ammunition.
- **Avoiding Hazards:**
 - Always ensure that the gage is properly calibrated before use.
 - Use appropriate personal protective equipment (PPE) such as safety glasses when working with reloading materials.
 - Do not exceed the recommended resizing limits to prevent damage to the cases and ensure safety.
 - Handle all reloading materials and tools with care to avoid accidents.

Instructions for Installation and Usage

- **Installation:**
 - Ensure that your reloading press is compatible with the WILSON CASE GAGE.
 - Securely attach the gage to your reloading press according to the manufacturer's instructions.
- **Usage:**
 - Before resizing, measure the headspace of the fired cases using a caliper and the gage.
 - Insert the case into the gage to check for overall length and datum to head length.
 - If the case requires trimming, do so before resizing.
 - For belted magnum cases, monitor the shoulder area closely to prevent excessive resizing.
 - After use, clean the gage to remove any debris or residue.

Disposal Instructions

- Dispose of the WILSON CASE GAGE responsibly at the end of its lifecycle.
- Do not dispose of the product in regular household waste.
- Check local regulations for proper disposal methods of tools and equipment.

Contact Information for Further Support
