

# WILSON CASE GAGE - 22 HORNET CASE GAGE

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

The most important use of a cartridge case gage is for setting up 7/8"-14 press type full length resizing dies. A common error in reloading is to oversize your brass. Headspace of fired cases can quickly and accurately be measured using this tool and a caliper. Regular Style: This one piece gage will check overall length to indicate a need for trimming and datum to head length to assure correct headspace to prevent over sizing. Adjustable Style: For belted mags. While the belt provides support for proper heads space, the life of the case will drastically shorten unless resizing is held to a minimum at the shoulder.  
SPECIAL ORDER CASE GAGES ARE AVAILABLE---MEASURE CASE LENGTH ONLY

## Attributes

- Name: [22 HORNET CASE GAGE](#)
- Manufacturer: [L.E. WILSON](#)
- Product no.: 749003960

## **Safety Instruction Guide**

### **Introduction**

Thank you for choosing the WILSON CASE GAGE 22 HORNET CASE GAGE. This product is designed to help you accurately measure cartridge cases for reloading purposes. It is essential to follow the safety guidelines and instructions provided in this manual to ensure safe and effective use.

### **General Safety Guidelines**

- Ensure that the product is used in accordance with the manufacturer's instructions.
- Keep the gage out of reach of children and vulnerable individuals.
- Always inspect the gage for any signs of damage before use. Do not use if damaged.
- Use the gage in a welllit area to ensure accurate measurements.
- Do not exceed the recommended specifications for cartridge cases.
- Report any unsafe conditions or accidents to the appropriate authorities.

### **Specific Safety Precautions for Use**

- Handle the gage with care to avoid any injuries.
- Always wear safety glasses when using the gage to protect your eyes.
- Ensure that your work area is clean and free of distractions.
- Do not use the gage for any purpose other than its intended use.
- Avoid using excessive force when measuring to prevent damage to the gage or the cartridge case.
- Store the gage in a protective case when not in use to prevent damage.

### **Instructions for Installation and Usage**

#### **1. Setting Up the Gage:**

- Ensure that the gage is clean and free from debris.
- If using the adjustable style for belted mags, adjust the gage to the required specifications.

#### **2. Measuring Cartridge Cases:**

- Place the cartridge case into the gage.
- Use a caliper to measure the headspace of the fired case.
- Check the overall length to determine if trimming is necessary.
- Ensure that the datum to head length is correct to avoid oversizing.

#### **3. Using with Reloading Dies:**

- Use the gage to set up 7/8"14 press type full length resizing dies.
- Regularly check the size of your brass to avoid oversizing.

#### **4. PostUse Care:**

- Clean the gage after each use to maintain accuracy.
- Store the gage in a safe location, away from moisture and extreme temperatures.

## **Disposal Instructions**

- Dispose of the gage in accordance with local regulations.
- If the gage is no longer usable, consider recycling it if possible.
- Do not dispose of the gage in regular household waste.

## **Contact Information for Further Support**

For any questions or concerns regarding the WILSON CASE GAGE 22 HORNET CASE GAGE, please refer to the manufacturer's contact information provided with the product packaging.

By following these safety guidelines and instructions, you can ensure a safe and effective experience with the WILSON CASE GAGE 22 HORNET CASE GAGE. Thank you for your attention to safety.
