

WILSON CASE GAGE - 6MM BR (1.56") CASE GAGE

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

The most important use of a cartridge case gage is for setting up 7/8"-14 press type full length resizing dies. A common error in reloading is to oversize your brass. Headspace of fired cases can quickly and accurately be measured using this tool and a caliper. Regular Style: This one piece gage will check overall length to indicate a need for trimming and datum to head length to assure correct headspace to prevent over sizing. Adjustable Style: For belted mags. While the belt provides support for proper headspace, the life of the case will drastically shorten unless resizing is held to a minimum at the shoulder. SPECIAL ORDER CASE GAGES ARE AVAILABLE---MEASURE CASE LENGTH ONLY

Attributes

- Name: [6MM BR \(1.56"\) CASE GAGE](#)
- Manufacturer: [L.E. WILSON](#)
- Product no.: 749003963
- Mfr. No.: CG-6BRL
- Cartridge: 6 mm BR Norma
- Delivery weight: 0.136kg
- Shipping height: 33mm
- Shipping width: 36mm
- Shipping length: 84mm

WILSON CASE GAGE 6MM BR (1.56") CASE GAGE

Safety Instruction Guide

Introduction

Thank you for choosing the WILSON CASE GAGE 6MM BR (1.56") CASE GAGE. This tool is designed to assist you in ensuring the proper dimensions of your cartridge cases for safe and effective reloading. Please read this safety instruction guide carefully to understand how to use the product safely and effectively.

General Safety Guidelines

- Ensure that the product is used only for its intended purpose.
- Keep the tool out of reach of children and vulnerable individuals.
- Regularly inspect the gage for any signs of wear or damage before use.
- Follow all safety instructions provided in this guide to minimize risks.
- In case of any accidents or unsafe conditions, report them to the relevant authorities.

Specific Safety Precautions for Use

- **Potential Hazards:**
 - Improper use of the case gage can lead to oversizing of brass, resulting in malfunction or dangerous situations during reloading.
 - Sharp edges may be present; handle with care to avoid cuts.
- **Avoiding Hazards:**
 - Always ensure the gage is clean and free from debris before use.
 - Use a caliper in conjunction with the gage to measure headspace accurately.
 - Do not force the gage into the case; it should fit smoothly.
- **Agesspecific Warnings:**
 - This product is not intended for use by children. Ensure adult supervision is present when used near minors.

Instructions for Installation and Usage

1. Setup:

- Ensure you have a clean, welllit workspace.
- Gather necessary tools: the WILSON CASE GAGE, a caliper, and your cartridge cases.

2. Measuring Headspace:

- Insert the cartridge case into the gage.
- Use a caliper to measure the headspace accurately.
- Check for any discrepancies and adjust your resizing die accordingly.

3. Checking Overall Length:

- Place the cartridge case into the gage.
- Observe the overall length indicator to determine if trimming is necessary.
- If the case is too long, trim it to the correct length before proceeding.

4. Using the Adjustable Style (for belted mags):

- Ensure the belt is properly aligned for accurate headspace measurement.

- Minimize resizing at the shoulder to prolong the life of the case.

5. **PostUse Care:**

- Clean the gage after each use to maintain accuracy.
- Store the gage in a safe, dry place away from children.

Disposal Instructions

- Dispose of the product in accordance with local regulations.
- If the gage is damaged beyond repair, ensure it is disposed of in a manner that prevents harm to the environment.

Contact Information for Further Support

For any questions or concerns regarding the safety or use of the WILSON CASE GAGE 6MM BR (1.56"), please refer to the manufacturer's contact details provided with your product packaging.

By following these guidelines, you can ensure a safe and effective experience when using the WILSON CASE GAGE. Thank you for prioritizing safety in your reloading activities.
