

WILSON CASE GAGE - 204 RUGER CASE GAGE

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

The most important use of a cartridge case gage is for setting up 7/8"-14 press type full length resizing dies. A common error in reloading is to oversize your brass. Headspace of fired cases can quickly and accurately be measured using this tool and a caliper. Regular Style: This one piece gage will check overall length to indicate a need for trimming and datum to head length to assure correct headspace to prevent over sizing. Adjustable Style: For belted mags. While the belt provides support for proper headspace, the life of the case will drastically shorten unless resizing is held to a minimum at the shoulder. SPECIAL ORDER CASE GAGES ARE AVAILABLE---MEASURE CASE LENGTH ONLY

Attributes

WILSON CASE GAGE 204 RUGER CASE GAGE

Safety Instruction Guide

Introduction

Thank you for choosing the WILSON CASE GAGE 204 RUGER CASE GAGE. This product is designed to assist you in the safe and effective resizing of cartridge cases. It is important to follow the safety guidelines and instructions outlined in this manual to ensure your safety and the proper functioning of the tool.

General Safety Guidelines

- Ensure that the gage is used only for its intended purpose, which is to check the overall length and headspace of 204 Ruger cartridge cases.
- Always wear appropriate safety gear, such as safety glasses and gloves, when handling reloading tools and materials.
- Keep the gage and all reloading components out of reach of children and unauthorized users.
- Inspect the gage for any signs of damage or wear before each use. Do not use if damaged.
- Be aware of your surroundings and ensure that you are working in a safe and welllit area.
- Follow all local laws and regulations regarding the handling and use of ammunition components.

Specific Safety Precautions for Use

- Do not exceed the recommended resizing limits for your brass to prevent oversizing and potential safety hazards.
- When measuring headspace, ensure that the caliper is properly calibrated for accurate readings.
- Use the gage in conjunction with a press type fulllength resizing die to achieve optimal results.
- For belted magnum cartridges, be mindful of the shoulder area to avoid excessive resizing, which can shorten the life of the case.
- Always doublecheck measurements before proceeding with reloading to avoid accidents.

Instructions for Installation and Usage

1. Setup:

- Ensure your reloading press is securely mounted and stable.
- Attach the resizing die to your press according to the manufacturer's instructions.

2. Using the Gage:

- Insert the cartridge case into the gage.
- Use a caliper to measure the overall length and ensure it is within specifications.
- Check the head length to confirm proper headspace.
- If trimming is necessary, use appropriate trimming tools to adjust the case length.

3. After Use:

- Clean the gage after each use to remove any debris or residue.
- Store the gage in a safe, dry place away from moisture and extreme temperatures.

Disposal Instructions

- Dispose of any damaged or worn gages in accordance with local regulations.
- Recycle materials wherever possible to minimize environmental impact.

- Ensure that all reloading components, including spent cartridge cases, are disposed of safely and responsibly.

Contact Information for Further Support

For any questions or concerns regarding the WILSON CASE GAGE 204 RUGER CASE GAGE, please consult the manufacturer's website or contact their customer service for assistance.

By following these safety instructions and guidelines, you can ensure a safe and efficient reloading experience. Thank you for your attention to safety!
