

WILSON CASE GAGE - 270 WINCHESTER CASE GAGE

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

The most important use of a cartridge case gage is for setting up 7/8"-14 press type full length resizing dies. A common error in reloading is to oversize your brass. Headspace of fired cases can quickly and accurately be measured using this tool and a caliper. Regular Style: This one piece gage will check overall length to indicate a need for trimming and datum to head length to assure correct headspace to prevent over sizing. Adjustable Style: For belted mags. While the belt provides support for proper headspace, the life of the case will drastically shorten unless resizing is held to a minimum at the shoulder.
SPECIAL ORDER CASE GAGES ARE AVAILABLE---MEASURE CASE LENGTH ONLY

Attributes

- Name: [270 WINCHESTER CASE GAGE](#)
- Manufacturer: [L.E. WILSON, INC.](#)
- Product no.: 749003970
- Mfr. No.: CG-270W

WILSON CASE GAGE 270 WINCHESTER CASE GAGE

Safety Instruction Guide

Introduction

Thank you for choosing the WILSON CASE GAGE 270 WINCHESTER CASE GAGE. This guide provides important safety instructions and usage guidelines to ensure the safe operation of this product. Please read this guide carefully before using the case gage.

General Safety Guidelines

- Ensure that the case gage is used only for its intended purpose, which is to measure cartridge case dimensions.
- Always handle the case gage with care to avoid damage.
- Keep the case gage out of reach of children and vulnerable individuals.
- Regularly inspect the case gage for any signs of wear or damage before use.
- If you notice any defects, do not use the case gage and contact the manufacturer for support.

Specific Safety Precautions for Use

- Use the case gage in a welllit and clean area to avoid accidents and ensure accurate measurements.
- Always wear appropriate personal protective equipment (PPE), such as safety glasses, when using the case gage.
- Do not exceed the recommended specifications when measuring cases, as this may lead to inaccurate readings or damage to the gage.
- Ensure that your hands are clean and free of oils or residues that could affect the measurement.
- Avoid using excessive force when inserting cases into the gage to prevent damage.

Instructions for Installation and Usage

1. Setting Up the Case Gage

- Place the case gage on a stable, flat surface.
- Ensure that the gage is clean and free from debris.

2. Measuring Cartridge Cases

- Insert the cartridge case into the gage, ensuring that it is seated properly.
- Use a caliper to measure the headspace of the fired case accurately.
- Check the overall length of the case to determine if trimming is necessary.

3. Adjustable Style Usage (For Belted Mags)

- When using the adjustable style for belted magnum cases, ensure that the belt is aligned correctly.
- Monitor the shoulder area of the case closely to prevent excessive resizing.

4. PostUse Care

- After use, clean the case gage with a soft cloth to remove any residue.
- Store the case gage in a safe, dry place to prevent damage.

Disposal Instructions

- Dispose of the case gage in accordance with local regulations regarding electronic waste and metal recycling.
- Do not dispose of the case gage in regular household waste.

Contact Information for Further Support

For any inquiries regarding safety or product information, please refer to the manufacturer's contact details provided with the product packaging.

By following these guidelines, you can ensure safe and effective use of the WILSON CASE GAGE 270 WINCHESTER CASE GAGE. Thank you for your attention to safety.
