

WILSON CASE GAGE - 243 WINCHESTER CASE GAGE

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

The most important use of a cartridge case gage is for setting up 7/8"-14 press type full length resizing dies. A common error in reloading is to oversize your brass. Headspace of fired cases can quickly and accurately be measured using this tool and a caliper. Regular Style: This one piece gage will check overall length to indicate a need for trimming and datum to head length to assure correct headspace to prevent over sizing. Adjustable Style: For belted mags. While the belt provides support for proper headspace, the life of the case will drastically shorten unless resizing is held to a minimum at the shoulder. SPECIAL ORDER CASE GAGES ARE AVAILABLE---MEASURE CASE LENGTH ONLY

Attributes

- Name: [243 WINCHESTER CASE GAGE](#)
- Manufacturer: [L.E. WILSON](#)

WILSON CASE GAGE 243 WINCHESTER CASE GAGE

Safety Instruction Guide

Introduction

Thank you for choosing the WILSON CASE GAGE 243 WINCHESTER CASE GAGE. This tool is designed to assist you in safely resizing your brass and ensuring proper headspace during the reloading process. This guide provides essential safety instructions and guidelines to ensure safe usage in compliance with the EU General Product Safety Regulation (GPSR).

General Safety Guidelines

- Ensure that the product is used only for its intended purpose as specified in this guide.
- Always handle the case gage with care to prevent damage or injury.
- Keep the tool out of reach of children and vulnerable individuals.
- Regularly inspect the gage for any signs of wear or damage before each use.
- Report any unsafe conditions or accidents to the appropriate authorities.
- Stay informed about any recall updates related to this product via the EU Safety Gate platform.

Specific Safety Precautions for Use

- **Avoid Oversizing:** Be cautious when resizing brass to prevent oversizing, which can lead to safety issues during firing.
- **Use Proper Equipment:** Always use the case gage in conjunction with compatible 7/8"14 press type fulllength resizing dies.
- **Measure Carefully:** Use a caliper to measure headspace accurately. Incorrect measurements can lead to dangerous conditions.
- **Follow Manufacturer Instructions:** Adhere to all instructions provided by the manufacturer to ensure safe and effective use.
- **Store Safely:** After use, store the gage in a safe place to prevent damage and ensure it remains in good condition.

Instructions for Installation and Usage

1. Setup:

- Ensure you have a clean, dry workspace free of clutter.
- Gather all necessary tools, including your resizing die and caliper.

2. Using the Gage:

- Insert the cartridge case into the gage.
- Check the overall length to determine if trimming is needed.
- Measure the datum to head length to ensure correct headspace.

3. For Adjustable Style:

- If using for belted magnums, ensure the shoulder is resized minimally to prolong case life.
- Regularly check the belt for proper support and adjustment.

4. PostUse:

- Clean the gage after each use to maintain accuracy and longevity.

- Store in a protective case or designated area to prevent damage.

Disposal Instructions

- Dispose of the WILSON CASE GAGE in accordance with local regulations regarding metal waste.
- Do not dispose of in regular household waste. Check with local waste management for appropriate disposal methods.

Contact Information for Further Support

For any questions or concerns regarding the WILSON CASE GAGE, please consult the manufacturer's website or customer service for assistance.

By following these safety guidelines and instructions, you can ensure a safe and effective reloading experience. Thank you for your attention to safety while using the WILSON CASE GAGE 243 WINCHESTER CASE GAGE.
