

# NECK SIZING DIES - REDDING NECK SIZING DIE 270 WIN

[Reloading](#) > [Reloading Dies](#) > [Rifle Dies](#)

The Redding Neck Sizing Dies size only the necks of your bottleneck cases to prolong brass life and improve accuracy. It is important that fired cases should never be interchanged between rifles since the neck sizing dies do not size the shoulder or body. Ideal for cartridges used in Bolt Action rifles. All dies are made using the finest alloy steels obtainable and machined on Hardinge Super-Precision lathes capable of holding the tightest tolerances in the industry. Heat treated in atmospherically controlled furnaces and hand polished for smooth, flawless functioning, these dies will maintain tolerances and last a lifetime. Inspected and ultrasonically cleaned before packaging.

## Attributes

# Safety Instruction Guide for Redding Neck Sizing Die 270 Win

## Introduction

Thank you for choosing the Redding Neck Sizing Die for your reloading needs. This guide provides important safety instructions and guidelines to ensure the safe and effective use of your die. Please read this document carefully before using the product.

## General Safety Guidelines

- Always handle the die with care to avoid injury.
- Ensure that your workspace is clean and organized to prevent accidents.
- Use the die only for its intended purpose—sizing the necks of bottleneck cases.
- Keep the die out of reach of children and vulnerable individuals.
- Always wear appropriate safety gear, such as safety glasses, when using reloading equipment.
- Be aware of any potential hazards associated with the materials you are working with, including spent cartridges and reloading components.

## Specific Safety Precautions for Use

- Before using the die, inspect it for any signs of damage or wear. Do not use a damaged die.
- Ensure that your reloading press is securely mounted and stable before use.
- When sizing cases, apply consistent and moderate pressure to avoid damaging the die or the cases.
- Do not interchange fired cases between different rifles, as this can lead to safety issues. Only size cases that are fired from the rifle you intend to use them in.
- Follow the manufacturer's instructions for proper setup and operation of your reloading press in conjunction with the die.

## Instructions for Installation and Usage

### 1. Installation:

- Securely attach the Redding Neck Sizing Die to your reloading press according to the manufacturer's instructions.
- Ensure that the die is properly aligned with the shell holder.

### 2. Usage:

- Begin by cleaning your fired cases to remove any dirt or debris.
- Insert the case into the shell holder of your reloading press.
- Slowly raise the ram to bring the case into contact with the die.
- Apply steady pressure to size the neck of the case. Do not force the case into the die.
- Once sized, lower the ram and remove the case from the shell holder.
- Inspect the sized case for any irregularities before proceeding with further reloading steps.

## Disposal Instructions

- Dispose of any unusable or damaged dies in a safe manner, following local regulations for metal waste.
- Do not discard spent cartridges or reloading components in regular trash. Follow your local guidelines for hazardous waste disposal.

## **Contact Information for Further Support**

For assistance or inquiries regarding the Redding Neck Sizing Die, please reach out to the manufacturer or your retailer for support.

By following these guidelines and instructions, you will ensure a safe and effective reloading experience with your Redding Neck Sizing Die. Always prioritize safety and consult the appropriate resources if you have any questions or concerns.
