

FULL LENGTH DIE SETS - RCBS FULL LENGTH 2-DIE SET 338 LAPUA MAG

[Reloading](#) > [Reloading Dies](#) > [Rifle Dies](#)

Full length die sets are for bottleneck rifle and pistol cases, and they include a full length sizing die and a seater die. The full length die will bump the shoulder of the case to extent the die is adjusted up or down in the press. We suggest using a cartridge headspace gage tool to get the correct shoulder bump. The full length die also sizes the body of the case so it will chamber easily for the next firing, then the die decaps the spent primer. The expander ball passes through the neck of the case and sizes the neck to the correct tension. Cases must be lubricated before full length sizing. The RCBS seater dies for bottleneck cases will seat bullets correctly in full length sized cases or neck sized cases. These seater dies have a built-in crimp ring to enable you to crimp the case into the bullet if you wish to. The seater die is easily adjusted to crimp or not to crimp by raising or lowering the die position in the press. Full length 2 die sets are the basic building block of the reloading process. Many shooters wear out multiple barrels or rifles using just one full length reloading die set. We recommend that new reloaders start with a full length die set and learn how to set the dies up correctly before they jump in to other types of reloading dies.

Attributes

- Name: [RCBS FULL LENGTH 2-DIE SET 338 LAPUA MAG](#)
- Manufacturer: [RCBS](#)
- Product no.: 749004605

Safety Instruction Guide for RCBS Full Length 2Die Set 338 Lapua Mag

Introduction

Thank you for choosing the RCBS Full Length 2Die Set for 338 Lapua Mag. This guide provides essential safety instructions and operational guidelines to ensure safe and effective use of your die set. It is important to read and understand all instructions before using this product.

General Safety Guidelines

- Always handle reloading equipment and materials with care.
- Ensure that your work area is welllit and free from distractions.
- Use personal protective equipment (PPE) such as safety glasses and gloves when reloading.
- Keep all reloading components, including primers and powders, out of reach of children and pets.
- Regularly inspect your reloading equipment for wear and damage.
- Follow local laws and regulations regarding ammunition reloading and storage.

Specific Safety Precautions for Use

- **Lubrication:** Always lubricate cases before full length sizing to prevent damage to the die and ensure smooth operation.
- **Die Adjustment:** Adjust the sizing die carefully to avoid overbumping the shoulder of the case, which can lead to dangerous ammunition.
- **Headspace Measurement:** Use a cartridge headspace gauge tool to ensure proper shoulder bump and avoid safety hazards.
- **Decapping:** Ensure that the die is properly set up to decap spent primers safely and effectively.
- **Crimping:** If crimping bullets, adjust the seater die carefully to ensure a secure fit without damaging the bullet or case.
- **Storage:** Store all reloading materials in a cool, dry place away from direct sunlight and heat sources.

Instructions for Installation and Usage

1. Setup:

- Read all instructions thoroughly before beginning.
- Securely mount the reloading press to a stable work surface.

2. Installing the Dies:

- Unscrew the lock nut on the sizing die and insert the die into the press.
- Adjust the die to the desired position and tighten the lock nut.
- Repeat the process for the seater die, ensuring it is set at the correct height for bullet seating.

3. Sizing Cases:

- Apply a thin layer of lubricant to each case before placing it in the sizing die.
- Operate the press to size the case fully, ensuring the die is adjusted correctly to avoid oversizing.

4. Decapping:

- After sizing, the die will automatically decap the spent primer. Ensure the primer catcher is in place to collect spent primers.

5. Seating Bullets:

- Insert a bullet into the case mouth and place the case in the seater die.
- Operate the press to seat the bullet to the desired depth. Adjust the seater die as needed for crimping.

6. Final Inspection:

- After reloading, visually inspect each round to ensure proper assembly and function.
- Store completed rounds in a safe and organized manner.

Disposal Instructions

- Dispose of any damaged or worn reloading components in accordance with local regulations.
- Do not throw away spent primers and cases in regular trash; check for local recycling programs.
- Ensure that all hazardous materials are disposed of in a safe and environmentally friendly manner.

Contact Information for Further Support

For any questions or concerns regarding the RCBS Full Length 2Die Set, please refer to the manufacturer's website or contact customer support for assistance.

By following these safety instructions, you can enjoy a safe and effective reloading experience. Always prioritize safety and adhere to all guidelines to ensure the best results with your RCBS Full Length 2Die Set.
