

TYPE S BUSHING FULL DIES - REDDING 222 REMINGTON BUSHING FULL LENGTH TYPE S DIE

[Reloading](#) > [Reloading Dies](#) > [Rifle Dies](#)

Full Length resizing while maintaining exact control of the case neck is often desirable in one operation. The Redding Type S Bushing Full Length Sizing Dies accomplish this task with the precision you would expect from Redding. Uses the same interchangeable bushings as those used in Redding bushing style neck sizing dies. The adjustable decapping rod allows you to adjust the bushing position, sizing only part of the neck length when desired. Concentricity is enhanced by the ability of the bushing to self-center on the neck of the cartridge case. All Type S dies are supplied with both the standard size button and a decapping pin retainer. By removing the bushing and all internal parts, the Type S Bushing Full Die may also be used as a body die.

Safety Instruction Guide for TYPE S BUSHING FULL DIES REDDING 222 REMINGTON BUSHING FULL LENGTH TYPE S DIE

Introduction

Thank you for choosing the Redding Type S Bushing Full Length Die for your reloading needs. This guide provides essential safety instructions and guidelines to ensure the safe and effective use of this product. Please read this manual carefully before use.

General Safety Guidelines

- Ensure that the product is used only for its intended purpose, which is resizing cartridge cases for the 222 Remington caliber.
- Always wear appropriate personal protective equipment (PPE), including safety glasses and gloves, while handling reloading equipment.
- Keep the die and all reloading components out of reach of children and unauthorized users.
- Regularly inspect the die for wear and damage. Do not use if any parts are broken or missing.
- Follow all local laws and regulations regarding the reloading of ammunition.

Specific Safety Precautions for Use

- Be aware of the potential hazards associated with reloading ammunition, including the risk of injury from improper handling and assembly.
- Ensure that the workspace is clean and free from distractions to prevent accidents.
- Use only recommended reloading components and follow the manufacturer's specifications for each component used in the reloading process.
- Avoid overtightening the die in the press, as this may cause damage to the die or press.
- Always check for proper alignment of the cartridge case and die before beginning the resizing process to ensure consistent results and safety.

Instructions for Installation and Usage

1. Installation:

- Securely mount the Redding Type S Bushing Full Length Die in your reloading press according to the manufacturer's instructions.
- Ensure that the die is properly aligned with the press ram for smooth operation.
- Insert the appropriate bushing into the die to suit your resizing needs.

2. Usage:

- Adjust the decapping rod as necessary to control the bushing position and to size only part of the neck length if desired.
- Begin the resizing process by inserting the cartridge case into the die and operating the press handle smoothly.
- After resizing, inspect the cartridge case for proper dimensions and concentricity.
- If using the die as a body die, remove the bushing and internal parts as instructed.

Disposal Instructions

- Dispose of any used or damaged components in accordance with local regulations for hazardous waste.
- Do not dispose of the die or any reloading components in regular household waste.
- Consider recycling options for metal components where applicable.

Contact Information for Further Support

For safety inquiries or further assistance regarding the Redding Type S Bushing Full Length Die, please contact your local supplier or refer to the manufacturer's website for additional resources.

By following these safety instructions, you can ensure a safe and effective reloading experience with the Redding Type S Bushing Full Length Die. Thank you for prioritizing safety in your reloading practices.
