

CHAMBER TYPE BULLET SEATER DIES - L.E. WILSON 6MM PPC BULLET SEATING DIE

[Reloading](#) > [Reloading Dies](#) > [Rifle Dies](#)

The Wilson chamber type bullet seater is a favorite among benchrest shooters. A chamber type bullet seater positively controls both bullet and cartridge case alignment. The case and bullet are completely captured by the die prior to the bullet being pushed straight into the case by a close-fitting seating stem. This style of bullet seater works more accurately than a conventional 7/8 inch to 14 bullet seating die. This is one of the most accurate bullet seaters ever made!

Attributes

Safety Instruction Guide for CHAMBER TYPE BULLET SEATER DIES L.E. WILSON 6MM PPC BULLET SEATING DIE

Introduction

Thank you for choosing the L.E. Wilson 6MM PPC Bullet Seating Die. This product is designed for precision bullet seating and is favored by benchrest shooters for its accuracy and reliability. To ensure safe and effective use of this product, please read and follow the safety instructions outlined in this guide.

General Safety Guidelines

- Ensure safe use of the bullet seater by following all instructions.
- Be aware of the potential hazards associated with reloading ammunition.
- Always use the product in a wellventilated area.
- Keep the product out of reach of children and unauthorized users.
- Regularly check for any product recalls or safety updates through the EU Safety Gate platform.

Specific Safety Precautions for Use

- Always wear appropriate safety gear, including safety glasses and gloves, when using the bullet seater.
- Ensure that the bullet seating die is compatible with the specific cartridge you are using (6MM PPC).
- Do not exceed the recommended bullet seating depth as specified by the bullet manufacturer.
- Avoid using damaged or worn components; inspect all parts before use.
- Handle all ammunition components with care to prevent accidental discharge.
- Store the bullet seater and all related components in a secure location when not in use.

Instructions for Installation and Usage

1. Installation

- Begin by securing the bullet seating die into your reloading press according to the manufacturer's instructions.
- Ensure that the die is tightened properly to prevent movement during use.

2. Usage

- Prepare your cartridge cases by cleaning and inspecting them for defects.
- Place the bullet into the die and ensure it is aligned correctly.
- Use the closefitting seating stem to push the bullet straight into the cartridge case.
- Monitor the seating depth carefully, adjusting as necessary to meet specifications.
- After seating, visually inspect each cartridge for proper bullet alignment and seating depth.

Disposal Instructions

- Dispose of any unused or damaged components according to local regulations.
- Do not dispose of ammunition or components in regular household waste.
- Contact local waste management authorities for guidance on proper disposal methods.

Contact Information for Further Support

For any safety inquiries or support regarding the L.E. Wilson 6MM PPC Bullet Seating Die, please refer to the appropriate EUbased contact point as required by the EU General Product Safety Regulation.

By following these safety instructions, you can ensure a safe and effective experience with your L.E. Wilson 6MM PPC Bullet Seating Die. Always prioritize safety and stay informed about best practices in ammunition reloading.
