

NECK SIZING DIES - REDDING NECK SIZING DIE 25-284 WIN

[Reloading](#) > [Reloading Dies](#) > [Rifle Dies](#)

The Redding Neck Sizing Dies size only the necks of your bottleneck cases to prolong brass life and improve accuracy. It is important that fired cases should never be interchanged between rifles since the neck sizing dies do not size the shoulder or body. Ideal for cartridges used in Bolt Action rifles. All dies are made using the finest alloy steels obtainable and machined on Hardinge Super-Precision lathes capable of holding the tightest tolerances in the industry. Heat treated in atmospherically controlled furnaces and hand polished for smooth, flawless functioning, these dies will maintain tolerances and last a lifetime. Inspected and ultrasonically cleaned before packaging.

Attributes

- Name: [REDDING NECK SIZING DIE 25-284 WIN](#)

Redding Neck Sizing Die Safety Instruction Guide

Introduction

Thank you for choosing the Redding Neck Sizing Die for your reloading needs. This guide provides essential safety instructions and guidelines to ensure the safe and effective use of your die. Please read through this document carefully before use.

General Safety Guidelines

- Always wear appropriate safety gear, including safety glasses and gloves, when handling reloading equipment.
- Keep the workspace clean and organized to prevent accidents.
- Ensure that all tools and equipment are in good working condition before use.
- Store the neck sizing die in a safe place, out of reach of children and pets.
- Do not interchange fired cases between different rifles; this can lead to safety hazards and affect accuracy.
- Be aware of the specific requirements for the cartridge you are using, in this case, the 25284 Winchester.

Specific Safety Precautions for Use

- Inspect the neck sizing die for any signs of damage or wear before each use.
- Only use the die with the appropriate reloading press as specified by the manufacturer.
- Ensure that the die is properly secured in the press before beginning the resizing process.
- Avoid overtightening the die, as this may lead to damage or malfunction.
- Never attempt to resize cases that have not been fired in your rifle, as this may cause safety issues.
- Follow the manufacturer's instructions for the specific resizing process to ensure proper use.

Instructions for Installation and Usage

1. Installation:

- Begin by ensuring your reloading press is clean and free of debris.
- Insert the neck sizing die into the reloading press and secure it according to the manufacturer's instructions.
- Adjust the die to the proper height for your specific cartridge, ensuring it is set to resize only the neck.

2. Usage:

- Prepare your fired cases by cleaning them thoroughly to remove any dirt or debris.
- Insert the case into the shell holder of the reloading press.
- Pull the handle of the press to bring the case up into the die. This will resize the neck of the case.
- Once the resizing is complete, lower the handle to remove the case from the die.
- Inspect the resized case for any defects or issues before proceeding with further reloading steps.

Disposal Instructions

- Dispose of any defective or damaged dies in accordance with local regulations.
- Ensure that all materials used in the reloading process are disposed of properly, including spent primers and brass cases.
- Recycle materials whenever possible to minimize environmental impact.

Contact Information for Further Support

For any questions or concerns regarding the Redding Neck Sizing Die, please refer to the manufacturer's contact information provided with your product or on their official website. It is important to have access to support for safe and effective use of your reloading equipment.

Thank you for following these safety guidelines and instructions. Your safety and satisfaction are our top priorities. Happy reloading!
