

# NECK SIZING DIES - REDDING NECK SIZING DIE 6MM/22-250 REM

[Reloading](#) > [Reloading Dies](#) > [Rifle Dies](#)

The Redding Neck Sizing Dies size only the necks of your bottleneck cases to prolong brass life and improve accuracy. It is important that fired cases should never be interchanged between rifles since the neck sizing dies do not size the shoulder or body. Ideal for cartridges used in Bolt Action rifles. All dies are made using the finest alloy steels obtainable and machined on Hardinge Super-Precision lathes capable of holding the tightest tolerances in the industry. Heat treated in atmospherically controlled furnaces and hand polished for smooth, flawless functioning, these dies will maintain tolerances and last a lifetime. Inspected and ultrasonically cleaned before packaging.

# Safety Instruction Guide for Redding Neck Sizing Die 6mm/22250 Rem

## Introduction

Thank you for choosing the Redding Neck Sizing Die for your reloading needs. This product is designed to size only the necks of your bottleneck cases, which can help prolong the life of your brass and improve accuracy. Please read and follow these safety instructions to ensure safe and effective use of the die.

## General Safety Guidelines

- Always ensure that the die is used in accordance with the manufacturer's instructions.
- Keep the die and all reloading equipment out of reach of children and unauthorized users.
- Inspect the die regularly for any signs of damage or wear. Do not use if damaged.
- Use appropriate personal protective equipment (PPE) such as safety glasses and gloves when handling reloading components.
- Be aware of your surroundings and ensure that you are working in a safe environment free from distractions.
- Report any unsafe products or accidents to the relevant authorities.

## Specific Safety Precautions for Use

- Do not interchange fired cases between different rifles. The neck sizing die does not size the shoulder or body of the case, which can lead to safety hazards.
- Ensure that the die is properly set up before use to avoid misalignment and potential accidents.
- Only use the die with the specified cartridge (6mm/22250 Remington) to prevent malfunction or damage.
- Avoid overtightening the die in the press, as this may cause damage to both the die and the press.
- Always follow safe reloading practices, including using the correct powder charges and bullet seating depths.

## Instructions for Installation and Usage

### 1. Installation:

- Secure the die in the reloading press according to the manufacturer's instructions.
- Make sure the die is tightened securely but not overtightened.
- Adjust the die height according to the specifications for your reloading setup.

### 2. Usage:

- Begin by inspecting your fired cases for any signs of damage or excessive wear.
- Place the case into the shell holder of the press.
- Raise the ram of the press to bring the case into contact with the die.
- Operate the press to size the neck of the case. Ensure that the press operates smoothly without excessive force.
- Once the sizing is complete, lower the ram and remove the case from the shell holder.
- Inspect the sized case to ensure it meets your specifications.

## Disposal Instructions

- Dispose of any damaged or worn reloading components in accordance with local regulations.
- Do not throw the die or any associated materials in regular trash. Check with local waste management for proper disposal methods.

- Ensure that all packaging materials are recycled or disposed of responsibly.

## **Contact Information for Further Support**

For any questions or concerns regarding the use of the Redding Neck Sizing Die, please refer to the manufacturer's contact information provided in the product packaging.

## **Conclusion**

By following these safety instructions, you can ensure a safe and effective reloading experience with your Redding Neck Sizing Die. Always prioritize safety and stay informed about best practices in reloading. Thank you for your attention to these guidelines.
