

# TYPE S BUSHING NECK DIES - REDDING TYPE S BUSHING NECK DIE 223 WSSM

[Reloading](#) > [Reloading Dies](#) > [Rifle Dies](#)

The Type S Bushing Neck Die provides reloaders with a simple means to precisely control case neck size and tension. Uses interchangeable sizing bushing available in .001" increments The adjustable decapping rod allows positioning the bushing to resize only a portion of the neck length if desired. Concentricity is enhanced by the ability of the resizing bushing to self-center on the case neck. The decapping rod is supplied with a standard size button. This is especially useful for reloaders who are using commercial brass as is. A decapping pin retainer is also supplied with most Type S Bushing Dies except 17 and 20 Caliber This enables neck sizing without the use of the size button for those who sort and/or turn case necks for uniformity.

## Attributes

# TYPE S BUSHING NECK DIES SAFETY INSTRUCTIONS

## Introduction

Thank you for choosing the TYPE S BUSHING NECK DIES by Redding. This product is designed for precision reloading, specifically for the 223 WSSM cartridge. To ensure your safety and the proper functioning of the die, please read and follow these safety instructions carefully.

## General Safety Guidelines

- Ensure safe use of this product by following all instructions.
- Be aware of potential risks associated with reloading equipment.
- Always use appropriate protective gear, such as safety glasses and gloves.
- Keep the die and all reloading components out of reach of children and vulnerable individuals.
- Regularly inspect the die for wear and damage before use.
- Report any unsafe products or accidents to the appropriate authorities.
- Stay informed about product recalls and safety updates via the EU's Safety Gate platform.

## Specific Safety Precautions for Use

- Always verify that the die is compatible with your specific reloading setup.
- Use only recommended sizing bushings to ensure proper neck sizing.
- Avoid overtightening the decapping rod, as it may cause damage to the die or injury.
- Do not attempt to modify the die or its components in any way.
- Ensure that the working area is clean and free from obstructions before starting the reloading process.
- Follow all local regulations regarding ammunition reloading.

## Instructions for Installation and Usage

### 1. Installation

- Secure the die in your reloading press according to the manufacturer's instructions.
- Ensure that the die is properly aligned with the press and tightened to avoid movement during operation.

### 2. Using the Die

- Select the appropriate sizing bushing for your desired neck size.
- Adjust the decapping rod to the desired position, allowing for partial neck resizing if necessary.
- Insert the case into the die and operate the press to resize the neck.
- After resizing, remove the case and inspect it for proper sizing and any signs of damage.

### 3. Decapping

- Use the supplied standard size button for decapping.
- If neck sizing without the size button is required, ensure that you have sorted and/or turned the case necks for uniformity.

### 4. PostUse Care

- Clean the die and components after use to prevent corrosion and buildup of debris.
- Store the die in a safe, dry place when not in use.

## **Disposal Instructions**

- Dispose of any damaged or worn components in accordance with local regulations.
- Do not throw away the die in regular household waste. Instead, consult local guidelines for hazardous waste disposal if applicable.

## **Contact Information for Further Support**

For any safety inquiries or concerns regarding the TYPE S BUSHING NECK DIES, please reach out to the appropriate EUbased contact point. Always ensure that you have the latest safety information and updates related to this product.

By following these safety instructions, you can enjoy a safe and effective reloading experience with your TYPE S BUSHING NECK DIES. Thank you for your attention to safety!
