

COMPETITION HANDGUN BULLET SEATER DIES - REDDING

COMPETITION SEATER DIE 38 SUPER AUTO

[Reloading](#) > [Reloading Dies](#) > [Handgun Dies](#)

These seater dies have a precision fitting bullet seating stem which is spring loaded. As the bullet and case move up into the seater positive alignment is insured. The micrometer adjustment on the seating stem simplifies setting and recording bullet seating depth. The micrometer is calibrated in .001 inch increments, is infinitely adjustable, and has a zero set feature. This seater has no crimping features. Crimping should be done with a separate Redding Profile Crimp or Taper Crimp die. The Competition seating die for the handgun and straight wall cases is compatible with most progressive reloading presses.

Competition Handgun Seater Dies Safety Instruction Guide

Introduction

Thank you for choosing the Redding Competition Handgun Seater Die for your reloading needs. This guide provides essential safety instructions and guidelines to ensure safe and effective use of the product. Please read this manual carefully before using the die.

General Safety Guidelines

- Ensure that you are familiar with the use of reloading equipment before operating the seater die.
- Always wear appropriate safety gear, including safety glasses and gloves, while working with reloading equipment.
- Keep the work area clean and free from distractions to avoid accidents.
- Store the seater die and all reloading components in a secure and dry place, out of reach of children and unauthorized users.
- Regularly inspect the die for wear and damage. Do not use if any parts are damaged or missing.
- Follow all local laws and regulations regarding the reloading of ammunition.

Specific Safety Precautions for Use

- **Hazard Identification:** The seater die is designed for bullet seating only. Crimping should be done with a separate die.
- **Positive Alignment:** Ensure that the bullet and case are properly aligned in the die to prevent misfires or accidents.
- **Micrometer Adjustment:** Use the micrometer adjustment feature carefully to set bullet seating depth. Make small adjustments to avoid overseating the bullet.
- **Spring Loaded Mechanism:** Be cautious when operating the springloaded bullet seating stem. Keep hands and fingers clear of moving parts.
- **Compatibility:** This die is compatible with most progressive reloading presses. Ensure that your press is properly set up before use.

Instructions for Installation and Usage

1. Installation:

- Securely attach the Redding Competition Seater Die to your reloading press according to the press manufacturer's instructions.
- Ensure that the die is tightened properly to prevent movement during operation.

2. Usage:

- Place a clean and inspected cartridge case into the reloading press.
- Insert a bullet into the case mouth.
- Adjust the micrometer on the seating stem to the desired bullet seating depth.
- Slowly raise the press handle to seat the bullet. Ensure that the bullet is seated to the correct depth without excessive force.
- Inspect the seated bullet to confirm proper seating depth and alignment.

3. Crimping:

- Remember that this die does not provide crimping features. Use a separate Redding Profile Crimp

or Taper Crimp die for crimping operations.

Disposal Instructions

- Dispose of any unused or damaged reloading components in accordance with local regulations.
- Do not dispose of the die in regular household waste. Check with local authorities for proper disposal methods.
- If the die is damaged beyond repair, consider recycling metal components where possible.

Contact Information for Further Support

For safety inquiries or support, please contact your local Redding dealer or visit the official Redding website for additional resources and assistance.

By following these safety instructions and guidelines, you can ensure a safe and effective reloading experience with the Redding Competition Handgun Seater Die. Always prioritize safety and stay informed about best practices in reloading.
