

# TYPE S BUSHING NECK DIES - REDDING TYPE S BUSHING NECK DIE 7MM IHMSA

[Reloading](#) > [Reloading Dies](#) > [Rifle Dies](#)

The Type S Bushing Neck Die provides reloaders with a simple means to precisely control case neck size and tension. Uses interchangeable sizing bushing available in .001" increments. The adjustable decapping rod allows positioning the bushing to resize only a portion of the neck length if desired. Concentricity is enhanced by the ability of the resizing bushing to self-center on the case neck. The decapping rod is supplied with a standard size button. This is especially useful for reloaders who are using commercial brass as is. A decapping pin retainer is also supplied with most Type S Bushing Dies except 17 and 20 Caliber. This enables neck sizing without the use of the size button for those who sort and/or turn case necks for uniformity.

## Attributes

- Name: [REDDING TYPE S BUSHING NECK DIE 7MM IHMSA](#)

# Safety Instruction Guide for TYPE S BUSHING NECK DIES REDDING TYPE S BUSHING NECK DIE 7MM IHMSA

## Introduction

Thank you for choosing the TYPE S BUSHING NECK DIE 7MM IHMSA by Redding. This guide provides essential safety instructions to ensure safe and effective use of the product. Please read this guide carefully before use to minimize risks and enhance your reloading experience.

## General Safety Guidelines

- Always follow the manufacturer's instructions for safe use of the die.
- Ensure that your workspace is clean, organized, and free from distractions.
- Use eye protection and hearing protection when operating reloading equipment.
- Keep the die and all reloading components out of reach of children and unauthorized users.
- Be aware of the specific hazards associated with reloading ammunition, including handling of powders and primers.
- Regularly inspect your equipment for any signs of wear or damage before use.

## Specific Safety Precautions for Use

- Do not exceed the maximum load specifications for your ammunition.
- Ensure that the sizing bushing is properly installed and secured before use.
- Avoid using the die with damaged or improperly sized cases.
- Use the adjustable decapping rod carefully to prevent injury during operation.
- Always wear appropriate personal protective equipment (PPE) while reloading.
- If you experience any unusual resistance or difficulty while resizing, stop and inspect the die and case for issues.

## Instructions for Installation and Usage

### 1. Installation:

- Ensure that your reloading press is securely mounted and stable.
- Attach the TYPE S BUSHING NECK DIE to the press according to the manufacturer's instructions.
- Select the appropriate sizing bushing and install it in the die. Ensure it is seated correctly.
- Adjust the decapping rod to the desired position, ensuring it is securely tightened.

### 2. Usage:

- Begin by preparing your cases for resizing. Clean and inspect all cases.
- Insert the case into the die and lower the press handle slowly.
- Monitor the resizing process, ensuring that the bushing selfcenters on the case neck.
- After resizing, remove the case and check for proper neck tension and concentricity.
- Repeat the process for additional cases, taking care to maintain a consistent technique.

## Disposal Instructions

- Dispose of any damaged or unusable parts in accordance with local regulations.
- Do not dispose of reloading components in regular household waste. Follow local guidelines for hazardous materials.

- Keep all packaging materials until you are sure you will not need to return the product.

## **Contact Information for Further Support**

For any safety inquiries or concerns regarding the TYPE S BUSHING NECK DIE 7MM IHMSA, please refer to the manufacturer's contact information provided with your product packaging.

## **Conclusion**

By following these safety instructions, you can ensure a safe and effective reloading experience with the TYPE S BUSHING NECK DIE 7MM IHMSA. Always prioritize safety and compliance with the EU General Product Safety Regulation (GPSR). Enjoy your reloading!
