

SINCLAIR COMPETITION SHOOTING REST - SINCLAIR INTERNATIONAL PORT LEVEL AMMO BLOCK - 22 & 6MM PPC

[Shooting Accessories](#) > [Shooting Rests](#) > [Rifle Rests](#)

The Sinclair Competition Shooting Rest is a result of our staff and our customer's years of shooting experience on the firing line, and in the field. We've incorporated the best design ideas, materials, and craftsmanship to present you with a shooting platform that rivals any windage rest available today. Whether you're competing in a benchrest discipline, F-Class, or wringing the most accuracy from your favorite shooting rig, the Sinclair Competition Rest offers the most versatile fit, function, and features in one complete package. NOTE: You will need to order a front bag in addition to the rest. We recommend the Protector Leather/Cordura or the Edgewood Standard Front Bags. Heavy and Compact The Sinclair Competition Rest's foundation begins with a one inch, solid steel base plate with a durable granite powder coat finish. This enables us to achieve a massive unit - over 30 pounds - with the lowest center of gravity, combined with a footprint that's no larger than other tripod rests currently on the market. It's nearly twice as heavy as our closest competitor. Mobile Most shooting rests by design, are awkward and difficult to manage and maneuver. We solved this by machining a carry handle into the base plate for easy transport, making the Sinclair Competition Rest one of the most mobile units available, in spite of its enormous weight. No tacky looking handles or impossible two-arm lift methods are needed. Effortless Operation The Sinclair Competition Rest has the windage operation built directly into the base plate. It incorporates dual sets of twin tapered roller bearings for an effortless, non-binding windage operation. The oversized windage control knob is positioned near the rear speed screw where simultaneous one-handed adjustment is easily achievable. Nearly four feet of windage adjustment is offered at 100 yards - enough for any bench shooting discipline. The oversized, fluted handwheel also offers smooth vertical adjustment with the aid of a thrust bearing. A non-windage-adjustable model is available for shooters who prefer to adjust windage off the rear bag or do not have a need for the windage adjustable base block. Ambidextrous Design The unique construction of this windage unit platform enables an entirely ambidextrous set-up for right or left handed shooters. The post, center column, controls and windage adjustment disassemble and reassemble on the opposite side, for a completely mirrored, left hand use. Hardware for Hard Wear The Sinclair Competition Rest includes upgraded hardware: a beefed up center column (1.95" up from 1.375"); threaded post (1" diameter up from 3/4"); leg screws (1/2" diameter up from 3/8"); and large diameter fluted speed screw - all made from high grade stainless steel to withstand a lifetime of abuse. All knob controls and handwheel are machined from aluminum then anodized or powder coated to provide a durable grip surface for all adjustments. Topping Perfection The Sinclair Competition Rest is completed with our Benchrest Top with new lockable forend stop assembly. Our Benchrest Top accepts both Edgewood and Protektor front bags in sporter, varmint, and benchrest configurations. The new lockable forend stop unit is adjustable for length (fore-aft), height, and cant. Our benchrest top is both NBRSA and IBS approved for competition shooting. The Sinclair Competition Rest is also available with our All-Purpose Top which features our updated Sinclair designed Edgewood Bag, easy adjust lockable bag ears and new forend stop. This top is an excellent choice for all Rimfire Benchrest competitions, particularly Sporter Rifle Class, as well as those wishing to attain

the highest level of accuracy from all of their rifles. Accessories The Sinclair Competition Rest includes mounting holes for aftermarket accessories you may wish to entertain. Such as our Port Level Ammo Block which enables the shooter to adjust their tray of 20 rounds of PPC or BR wherever needed. Move it close to your rifle port for fast shooting.

Attributes

- Name: [SINCLAIR INTERNATIONAL PORT LEVEL AMMO BLOCK - 22 & 6MM PPC](#)

Sinclair Competition Shooting Rest Safety Instructions

Introduction

Thank you for choosing the Sinclair Competition Shooting Rest. This product has been designed with safety and performance in mind. Please read this safety instruction guide carefully to ensure safe and effective use of the product.

General Safety Guidelines

- Ensure that the product is used only for its intended purpose as a shooting rest.
- Always follow local laws and regulations regarding firearms and shooting practices.
- Inspect the shooting rest before each use for any signs of wear or damage.
- Keep the shooting rest out of reach of children and unauthorized users.
- Use protective eyewear and hearing protection while shooting.
- Report any unsafe conditions or incidents to the appropriate authorities.
- Stay informed about product recalls and safety updates through the EU's Safety Gate platform.

Specific Safety Precautions for Use

- Only use the Sinclair Competition Shooting Rest on stable, flat surfaces to prevent tipping or instability.
- Do not exceed the weight limit of the shooting rest, which is 30 lbs.
- Ensure that all adjustments (windage, height, etc.) are securely locked before use.
- Do not attempt to modify or disassemble the rest unless specified in the product manual.
- Keep hands and other body parts clear of all moving parts during adjustments.
- Always ensure that your firearm is unloaded when setting up or adjusting the shooting rest.
- Use only compatible front bags, such as the Protector Leather/Cordura or Edgewood Standard Front Bags.

Instructions for Installation and Usage

1. Setup:

- Place the Sinclair Competition Shooting Rest on a stable, level surface.
- Ensure that the base plate is securely positioned to prevent any movement.

2. Adjusting Height:

- Loosen the height adjustment knob by turning it counterclockwise.
- Adjust the height of the rest from 5" to 10" as needed.
- Tighten the knob securely after making adjustments.

3. Windage Adjustment:

- Locate the oversized windage control knob on the rear of the base plate.
- Turn the knob to adjust the windage as needed; approximately 60" of adjustment is available at 100 yards.
- Ensure the knob is firmly tightened after adjustments.

4. Using the Front Bag:

- Attach the compatible front bag to the top of the rest.
- Adjust the lockable forend stop assembly for length, height, and cant as needed.

5. Transporting the Rest:

- Use the builtin carry handle for easy transport.
- Ensure that all adjustments are locked before moving the rest to avoid damage.

Disposal Instructions

- Dispose of the Sinclair Competition Shooting Rest in accordance with local regulations.
- Recycle materials where possible, such as metal and plastic components.
- Do not dispose of the product in household waste.

Contact Information for Further Support

For any inquiries regarding safety or product performance, please refer to the contact information provided with your product packaging or visit the manufacturer's website.

By following these safety instructions, you can ensure a safe and enjoyable experience with your Sinclair Competition Shooting Rest. Thank you for your attention to safety.
