

# SINCLAIR COMPETITION SHOOTING REST - SINCLAIR INTERNATIONAL PORT LEVEL AMMO BLOCK - BR FAMILY, 308 WIN FAMILY, 6.5/284

[Shooting Accessories](#) > [Shooting Rests](#) > [Rifle Rests](#)

The Sinclair Competition Shooting Rest is a result of our staff and our customer's years of shooting experience on the firing line, and in the field. We've incorporated the best design ideas, materials, and craftsmanship to present you with a shooting platform that rivals any windage rest available today. Whether you're competing in a benchrest discipline, F-Class, or wringing the most accuracy from your favorite shooting rig, the Sinclair Competition Rest offers the most versatile fit, function, and features in one complete package. NOTE: You will need to order a front bag in addition to the rest. We recommend the Protector Leather/Cordura or the Edgewood Standard Front Bags. Heavy and Compact The Sinclair Competition Rest's foundation begins with a one inch, solid steel base plate with a durable granite powder coat finish. This enables us to achieve a massive unit - over 30 pounds - with the lowest center of gravity, combined with a footprint that's no larger than other tripod rests currently on the market. It's nearly twice as heavy as our closest competitor. Mobile Most shooting rests by design, are awkward and difficult to manage and maneuver. We solved this by machining a carry handle into the base plate for easy transport, making the Sinclair Competition Rest one of the most mobile units available, in spite of its enormous weight. No tacky looking handles or impossible two-arm lift methods are needed.

Effortless Operation The Sinclair Competition Rest has the windage operation built directly into the base plate. It incorporates dual sets of twin tapered roller bearings for an effortless, non-binding windage operation. The oversized windage control knob is positioned near the rear speed screw where simultaneous one-handed adjustment is easily achievable. Nearly four feet of windage adjustment is offered at 100 yards - enough for any bench shooting discipline. The oversized, fluted handwheel also offers smooth vertical adjustment with the aid of a thrust bearing. A non-windage-adjustable model is available for shooters who prefer to adjust windage off the rear bag or do not have a need for the windage adjustable base block. Ambidextrous Design

The unique construction of this windage unit platform enables an entirely ambidextrous set-up for right or left handed shooters. The post, center column, controls and windage adjustment disassemble and reassemble on the opposite side, for a completely mirrored, left hand use. Hardware for Hard Wear The Sinclair Competition Rest includes upgraded hardware: a beefed up center column (1.95" up from 1.375"); threaded post (1" diameter up from 3/4"); leg screws (1/2" diameter up from 3/8"); and large diameter fluted speed screw - all made from high grade stainless steel to withstand a lifetime of abuse. All knob controls and handwheel are machined from aluminum then anodized or powder coated to provide a durable grip surface for all adjustments. Topping Perfection The Sinclair Competition Rest is completed with our Benchrest Top with new lockable forend stop assembly. Our Benchrest Top accepts both Edgewood and Protektor front bags in sporter, varmint, and benchrest configurations. The new lockable forend stop unit is adjustable for length (fore-aft), height, and cant. Our benchrest top is both NBRSA and IBS approved for competition shooting. The Sinclair Competition Rest is also available with our All-Purpose Top which features our updated Sinclair designed Edgewood Bag, easy adjust lockable bag ears and new forend stop. This top is an excellent choice for all Rimfire Benchrest

competitions, particularly Sporter Rifle Class, as well as those wishing to attain the highest level of accuracy from all of their rifles. Accessories The Sinclair Competition Rest includes mounting holes for aftermarket accessories you may wish to entertain. Such as our Port Level Ammo Block which enables the shooter to adjust their tray of 20 rounds of PPC or BR wherever needed. Move it close to your rifle port for fast shooting.

## Attributes

- Name: [SINCLAIR INTERNATIONAL PORT LEVEL AMMO BLOCK - BR FAMILY, 308 WIN FAMILY, 6.5/284](#)
- Manufacturer: [SINCLAIR INTERNATIONAL](#)
- Product no.: 749008511

# Sinclair Competition Shooting Rest Safety Instruction Guide

## Introduction

Thank you for choosing the Sinclair Competition Shooting Rest. This guide provides essential safety instructions to ensure a safe and effective use of your shooting rest. Please read this guide carefully before use and keep it for future reference.

## General Safety Guidelines

- Ensure that the shooting rest is used only for its intended purpose.
- Always inspect the shooting rest for any damage or wear before each use.
- Keep the shooting rest out of reach of children and vulnerable individuals.
- Follow all local laws and regulations regarding shooting and firearm use.
- Report any unsafe conditions or accidents to the appropriate authorities.

## Specific Safety Precautions for Use

- **Weight Consideration:** The Sinclair Competition Rest weighs over 30 lbs. Ensure that you can safely lift and maneuver the unit without straining yourself.
- **Windage Adjustment:** When adjusting the windage, ensure that your hands are clear of moving parts to avoid injury.
- **Ambidextrous Design:** If switching the setup for lefthanded use, ensure that all components are securely reassembled before use.
- **Front Bag Requirement:** Always use a front bag with the shooting rest to ensure stability and accuracy. Recommended bags include the Protector Leather/Cordura or Edgewood Standard Front Bags.
- **Surface Stability:** Use the rest only on stable and level surfaces to prevent tipping or accidental movement during use.
- **Transporting:** Use the carry handle for safe transport. Avoid dragging or dropping the unit to prevent damage and injury.

## Instructions for Installation and Usage

### 1. Unpacking:

- Carefully remove the shooting rest from its packaging.
- Inspect all components for damage before assembly.

### 2. Assembly:

- If using the ambidextrous setup, disassemble the post, center column, and controls from the right side and reassemble them on the left side.
- Ensure all parts are securely tightened before use.

### 3. Setting Up:

- Place the shooting rest on a stable, level surface.
- Attach your chosen front bag to the Benchrest Top.

### 4. Adjusting Height:

- Use the oversized fluted handwheel to adjust the height of the rest. Ensure that the adjustment is

smooth and secure.

#### **5. Windage Adjustment:**

- Use the oversized windage control knob located near the rear speed screw for adjustments. Make sure you are in a safe position while adjusting.

#### **6. Using the Shooting Rest:**

- Position your rifle securely on the rest and ensure it is stable before taking any shots.
- Always maintain proper shooting posture and follow safe shooting practices.

#### **7. PostUse:**

- After use, disassemble the rest if necessary and store it in a safe, dry place.
- Clean the rest as needed to maintain its condition.

## **Disposal Instructions**

- When disposing of the Sinclair Competition Shooting Rest, follow local regulations for disposal of metal and other materials.
- Consider recycling components where possible to minimize environmental impact.

By following these safety instructions, you can ensure a safe and enjoyable shooting experience with your Sinclair Competition Shooting Rest. Thank you for your attention to safety!
