

TYPE S BUSHING NECK DIES - TYPE S BUSHING NECK DIE 6.5 CREEDMOOR

[Reloading](#) > [Reloading Dies](#) > [Rifle Dies](#)

The Type S Bushing Neck Die provides reloaders with a simple means to precisely control case neck size and tension. Uses interchangeable sizing bushing available in .001" increments The adjustable decapping rod allows positioning the bushing to resize only a portion of the neck length if desired. Concentricity is enhanced by the ability of the resizing bushing to self-center on the case neck. The decapping rod is supplied with a standard size button. This is especially useful for reloaders who are using commercial brass as is. A decapping pin retainer is also supplied with most Type S Bushing Dies except 17 and 20 Caliber This enables neck sizing without the use of the size button for those who sort and/or turn case necks for uniformity.

Safety Instruction Guide for TYPE S BUSHING NECK DIES TYPE S BUSHING NECK DIE 6.5 CREEDMOOR

Introduction

Thank you for choosing the TYPE S BUSHING NECK DIE 6.5 CREEDMOOR. This guide provides essential safety instructions and precautions to ensure the safe and effective use of this product. Please read this guide thoroughly before using the die.

General Safety Guidelines

- Ensure that all safety precautions are followed when using reloading equipment.
- Store the die in a dry, cool place away from direct sunlight and moisture.
- Always use the die in accordance with the manufacturer's instructions.
- Keep the die out of reach of children and unauthorized users.
- Regularly inspect the die for wear and damage before each use.
- Report any unsafe conditions or accidents to the appropriate authorities.

Specific Safety Precautions for Use

- Always wear appropriate eye protection when operating the die to prevent injury from debris or accidental discharge.
- Use proper reloading techniques to avoid oversizing or damaging the case neck.
- Ensure that the bushing is securely installed before resizing.
- Avoid using excessive force when resizing cases; this can lead to damage or breakage.
- Be cautious when handling sharp tools and components associated with reloading.
- Do not exceed the recommended load limits for the cases you are reloading.

Instructions for Installation and Usage

1. Installation of the Die:

- Ensure the reloading press is securely mounted and stable.
- Insert the Type S Bushing Neck Die into the press and tighten it according to the manufacturer's specifications.
- Select the appropriate sizing bushing for your desired neck size.

2. Adjusting the Decapping Rod:

- Loosen the decapping rod lock nut.
- Adjust the decapping rod to the desired position for neck resizing.
- Retighten the lock nut to secure the position.

3. Resizing Cases:

- Insert a clean case into the die.
- Lower the ram of the press to engage the die with the case.
- Apply steady pressure to resize the case neck.
- Raise the ram to withdraw the resized case.

4. Decapping:

- The die is equipped with a standard size button for decapping.
- Ensure the decapping pin is properly retained for effective operation.
- Follow the same procedure as above for decapping.

5. Neck Sizing without the Button:

- For those who sort or turn case necks, remove the size button and use the die for neck sizing only.

Disposal Instructions

- Dispose of any damaged or worn components in accordance with local regulations.
- Do not dispose of the die in regular household waste. Instead, contact local waste management authorities for proper disposal methods.

Contact Information for Further Support

For any inquiries or additional support regarding the TYPE S BUSHING NECK DIE 6.5 CREEDMOOR, please refer to the manufacturer's contact information provided with the product or visit their official website.

Thank you for prioritizing safety while using the TYPE S BUSHING NECK DIE 6.5 CREEDMOOR. Following these guidelines will help ensure a safe and effective reloading experience.
