

SINCLAIR REDDING DIE LOCK RING PLIERS - SINCLAIR INTERNATIONAL DIE LOCK RING PLIERS FOR SINCLAIR

[Reloading](#) > [Reloading Dies](#) > [Replacement Parts & Upgrades](#)

These machined aluminum split pliers are designed to loosen Redding dies when screwed into the press. These pliers fit the die body lock ring, which frequently is in a jammed fit with the die and the top of the reloading press. The smaller hole fits the smaller knurled lock nut on top of the reloading die that locks down the decapping assembly. The contoured fit of these pliers prevents the damage we routinely see on lock rings from handloaders using adjustable pliers.

Safety Instruction Guide for Sinclair Redding Die Lock Ring Pliers

Introduction

Thank you for choosing Sinclair Redding Die Lock Ring Pliers. These pliers are designed to help you safely loosen Redding dies when they are secured in the press. This guide provides important safety information, usage instructions, and disposal guidelines to ensure your safety and the effective use of this product.

General Safety Guidelines

- Ensure that you read and understand all instructions before using the pliers.
- Always use the pliers for their intended purpose as described in this guide.
- Keep the pliers out of reach of children and vulnerable individuals.
- Inspect the pliers for any damage or defects before use. Do not use if damaged.
- Store the pliers in a dry, secure place when not in use.
- Follow all local regulations and guidelines regarding the use of tools and equipment.

Specific Safety Precautions for Use

- Use the pliers only on the die body lock ring and the smaller knurled lock nut.
- Avoid applying excessive force, as this may damage the pliers or the die.
- Do not use the pliers to grip or turn anything other than the intended components.
- Wear safety glasses to protect your eyes from any debris that may be dislodged during use.
- If you experience difficulty loosening a die, do not force the pliers. Seek assistance or consult the manufacturer.

Instructions for Installation and Usage

1. Preparation:

- Ensure that the reloading press is turned off and disconnected from any power source.
- Make sure the area is welllit and free of clutter.

2. Using the Pliers:

- Identify the die body lock ring and the smaller knurled lock nut.
- Position the pliers around the die body lock ring to ensure a secure fit.
- Gently rotate the pliers counterclockwise to loosen the lock ring.
- For the smaller knurled lock nut, use the smaller hole of the pliers, and follow the same counterclockwise motion.
- If the lock ring or nut is jammed, apply gentle pressure and try again. Do not force the pliers.

3. PostUse:

- After successfully loosening the die, remove the pliers and store them properly.
- Clean any debris from the pliers to maintain their functionality.

Disposal Instructions

- Dispose of the pliers in accordance with local regulations.
- If the pliers are damaged beyond repair, consider recycling the aluminum material where possible.
- Do not dispose of the pliers in regular household waste if they are still functional, as they can be reused.

Contact Information for Further Support

For any inquiries regarding safety or product usage, please contact the manufacturer directly through their official communication channels.

By following these guidelines, you can ensure the safe and effective use of your Sinclair Redding Die Lock Ring Pliers. Thank you for prioritizing safety in your reloading activities.
