

WILSON CASE GAGE - 300 REMINGTON ULTRA MAGNUM CASE GAGE

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

The most important use of a cartridge case gage is for setting up 7/8"-14 press type full length resizing dies. A common error in reloading is to oversize your brass. Headspace of fired cases can quickly and accurately be measured using this tool and a caliper. Regular Style: This one piece gage will check overall length to indicate a need for trimming and datum to head length to assure correct headspace to prevent over sizing. Adjustable Style: For belted mags. While the belt provides support for proper headspace, the life of the case will drastically shorten unless resizing is held to a minimum at the shoulder. SPECIAL ORDER CASE GAGES ARE AVAILABLE---MEASURE CASE LENGTH ONLY

Attributes

- Name: [300 REMINGTON ULTRA MAGNUM CASE GAGE](#)

WILSON CASE GAGE 300 REMINGTON ULTRA MAGNUM CASE GAGE Safety Instruction Guide

Introduction

Thank you for choosing the WILSON CASE GAGE 300 REMINGTON ULTRA MAGNUM CASE GAGE. This guide provides important safety information and instructions to ensure safe and effective use of the product. Please read this guide carefully before use.

General Safety Guidelines

- Ensure the product is used in accordance with the manufacturer's instructions.
- Always handle tools and equipment with care to prevent accidents.
- Keep the product out of reach of children and vulnerable individuals.
- Regularly inspect the gage for any signs of damage or wear before use.
- Use the gage only for its intended purpose as described in this guide.
- Report any unsafe products or incidents to the appropriate authorities.

Specific Safety Precautions for Use

- **Hazard Identification:** The primary hazards associated with the use of this gage involve improper measurement and resizing of cartridge cases, which can lead to malfunction or damage.
- **Proper Handling:** Always ensure your hands are dry and clean when handling the gage to maintain a secure grip.
- **Caliper Use:** When measuring headspace, use a caliper designed for precision to avoid inaccuracies.
- **Oversizing Warning:** Be cautious not to oversize your brass. Regular checks with the gage are recommended to maintain proper dimensions.
- **Belted Magnums:** Special care should be taken when working with belted magnums to avoid excessive resizing at the shoulder.
- **Trimming Requirement:** Check overall length regularly to determine if trimming is necessary to ensure safe operation.

Instructions for Installation and Usage

1. Setup:

- Place the gage on a stable, flat surface.
- Ensure that the area is welllit and free from distractions.

2. Measuring:

- Use a caliper to measure the headspace of fired cases using the gage.
- Insert the cartridge case into the gage and check for fit.
- If the case does not fit correctly, it may require trimming or resizing.

3. Using the Adjustable Style:

- For belted magnums, ensure that the belt is properly seated in the gage.
- Regularly check the shoulder area for signs of wear or overresizing.

4. Maintenance:

- Clean the gage after each use to prevent debris buildup.

- Store the gage in a dry place, away from moisture and extreme temperatures.

Disposal Instructions

- Dispose of the gage and any associated materials in accordance with local regulations.
- Do not dispose of in regular household waste if it is deemed hazardous.

Contact Information for Further Support

For any questions or concerns regarding the use of this product, please refer to the manufacturer's website or customer service for assistance. Ensure you have the product details handy for a quicker response.

By following these guidelines and instructions, you can ensure the safe and effective use of the WILSON CASE GAGE 300 REMINGTON ULTRA MAGNUM CASE GAGE. Thank you for your attention to safety.
