Safety Instruction Guide for L.E. Wilson Micrometer Top Bullet Seater Dies

Introduction

Thank you for choosing the L.E. Wilson Micrometer Top Bullet Seater Dies. This product is designed to provide reloaders with a reliable tool for achieving accurate bulletseating depths. To ensure safe and effective use of this product, please read and follow the safety instructions outlined in this guide.

General Safety Guidelines

- Always use the product in accordance with the manufacturer's instructions.
- Ensure that the workspace is clean, dry, and welllit before using the bullet seater.
- Keep the product out of reach of children and unauthorized users.
- Use personal protective equipment (PPE) such as safety glasses and gloves when handling reloading equipment.
- Be aware of the potential hazards associated with reloading ammunition, including the risk of injury and property damage.
- Regularly inspect the product for wear and damage. Do not use if any components are compromised.

Specific Safety Precautions for Use

- Ensure that the Arbor Press used with the bullet seater is stable and secure before operation.
- Never exceed the maximum recommended bulletseating depth specified for your cartridge.
- Use caution when adjusting the micrometer top; make small adjustments to avoid overseating bullets.
- Keep hands clear of the die and press during operation to prevent injury.
- Store the bullet seater in a secure location when not in use to prevent unauthorized access.

Instructions for Installation and Usage

1. Installation:

- Ensure that the Arbor Press is properly set up and secured on a stable surface.
- Attach the L.E. Wilson Micrometer Top Bullet Seater Die to the Arbor Press according to the manufacturer's instructions.
- Confirm that the die is tightened and securely in place before proceeding.

2. Usage:

- Prepare your cases and bullets according to standard reloading practices.
- Insert a case into the die and position a bullet on top of the case.
- Adjust the micrometer top to the desired bulletseating depth, ensuring it is set in 0.001" increments for precision.
- Apply steady pressure on the Arbor Press handle to seat the bullet into the case.
- Remove the seated bullet and check the seating depth with a caliper for accuracy.
- Repeat the process as necessary, making adjustments to the micrometer top as needed.

Disposal Instructions

- Dispose of any unused or damaged components in accordance with local regulations for hazardous waste.
- Do not dispose of the product in regular household waste. Check for recycling options for metal components.

- Ensure that all packaging materials are disposed of responsibly.

Contact Information for Further Support

For any questions, concerns, or safety inquiries regarding the L.E. Wilson Micrometer Top Bullet Seater Dies, please refer to the manufacturer's contact information provided with your product. It is important to reach out for support if you encounter any issues or have safety concerns.

Thank you for your attention to these safety guidelines. By following these instructions, you can ensure a safe and effective reloading experience with your L.E. Wilson Micrometer Top Bullet Seater Dies.
