

VLD BULLET SEATING MICROMETERS - REDDING #6 VLD BULLET SEATING MICROMETER

[Reloading](#) > [Measuring Tools](#) > [Micrometers](#)

Redding Competition Seating Dies deliver the precision and accuracy preferred by the most discriminating handloaders. Now you can easily convert your conventional seating die to a precision micrometer seating die for use with VLD bullets for precise, repeatable bullet seating depths to within 1/1000th of an inch and potential world-record accuracy. Designed for all seating dies that use a seat plug with 1/2-20 threads. Easily changes from one die to another, just match the number on your current seating plug to the corresponding bullet seating micrometer number. View Redding Micrometer Reference Chart here.

VLD BULLET SEATING MICROMETER Safety Instructions

Introduction

Thank you for choosing the VLD Bullet Seating Micrometers Redding #6. This product is designed to enhance your reloading process by providing precise bullet seating depths for VLD bullets. To ensure safe and effective use of this product, please read and follow the safety instructions provided in this guide.

General Safety Guidelines

- Always follow the manufacturer's instructions when using this product.
- Ensure that your workspace is clean, dry, and wellventilated.
- Store the micrometer in a safe place out of reach of children and pets.
- Regularly inspect the micrometer for any signs of damage or wear before use.
- Report any unsafe products or accidents to the appropriate authorities.
- Check for updates on product recalls through the EU's Safety Gate platform.

Specific Safety Precautions for Use

- Use only with compatible seating dies that utilize a seat plug with $\frac{1}{2}20$ threads.
- Do not exceed the recommended bullet seating depth to avoid potential safety hazards.
- Always wear appropriate eye protection while reloading ammunition.
- Ensure that the micrometer is securely attached to the seating die before use.
- Do not attempt to modify or disassemble the micrometer.
- Keep hands and body clear of the reloading press while operating.

Instructions for Installation and Usage

1. Installation:

- Identify your current seating die and the corresponding micrometer number.
- Remove the existing seating plug from the die.
- Align the micrometer with the die and securely attach it by threading it into place.
- Ensure that the micrometer is properly seated and locked in position.

2. Usage:

- Set the desired bullet seating depth using the micrometer adjustment.
- Insert the bullet into the case and place it under the seating die.
- Activate the reloading press to seat the bullet to the specified depth.
- After seating, check the depth with a caliper to ensure accuracy.
- Repeat the process for additional cartridges, adjusting the micrometer as necessary.

Disposal Instructions

- Dispose of any damaged or wornout micrometers in accordance with local regulations.
- Do not throw the micrometer in regular household waste.
- Check with local waste management authorities for proper disposal methods.

Contact Information for Further Support

For any questions or concerns regarding the VLD Bullet Seating Micrometers Redding #6, please refer to the manufacturer's website or customer service for assistance.

Thank you for prioritizing safety and precision in your reloading activities!
