

VLD BULLET SEATING MICROMETERS - REDDING #23 VLD BULLET SEATING MICROMETER

[Reloading](#) > [Measuring Tools](#) > [Micrometers](#)

Redding Competition Seating Dies deliver the precision and accuracy preferred by the most discriminating handloaders. Now you can easily convert your conventional seating die to a precision micrometer seating die for use with VLD bullets for precise, repeatable bullet seating depths to within 1/1000th of an inch and potential world-record accuracy. Designed for all seating dies that use a seat plug with 1/2-20 threads. Easily changes from one die to another, just match the number on your current seating plug to the corresponding bullet seating micrometer number. View Redding Micrometer Reference Chart here.

VLD Bullet Seating Micrometers Safety Instructions

Introduction

Thank you for choosing the VLD Bullet Seating Micrometers by Redding. This product is designed to enhance the precision of your handloading experience. Please read this safety instruction guide carefully to ensure safe and effective use of the product.

General Safety Guidelines

- Ensure the product is used in accordance with the manufacturer's instructions.
- Always inspect the micrometer for any signs of damage before use.
- Keep the micrometer and all related tools out of reach of children and pets.
- Use safety glasses and appropriate personal protective equipment (PPE) when handling bullets and reloading equipment.
- Follow all local laws and regulations regarding ammunition reloading and handling.

Specific Safety Precautions for Use

- Do not exceed the recommended bullet seating depths as indicated in the product specifications.
- Always ensure that the seating die is securely attached before use to prevent accidental dislodging.
- Avoid using the micrometer in wet or humid conditions to prevent rust and damage.
- Be cautious of sharp edges and points on the micrometer and bullets.
- If you experience any difficulties or irregularities during use, stop and consult the manufacturer's guidelines or a professional.

Instructions for Installation and Usage

1. Installation

- Ensure the reloading press is turned off and unplugged.
- Remove the existing seating plug from your seating die.
- Match the number on your current seating plug to the corresponding bullet seating micrometer number.
- Screw the VLD Bullet Seating Micrometer onto the die using the $\frac{1}{2}20$ threads until secure.
- Doublecheck that the micrometer is properly installed before proceeding.

2. Usage

- Set the desired bullet seating depth by adjusting the micrometer dial.
- Insert the bullet into the case and place it in the seating die.
- Pull the handle of the reloading press to seat the bullet.
- Check the bullet seating depth using the micrometer for precision.
- Repeat the process as necessary for additional rounds.

Disposal Instructions

- Dispose of any defective or damaged micrometers in accordance with local waste disposal regulations.
- Do not dispose of the product in regular household waste if it contains hazardous materials.
- Contact local recycling centers for proper disposal methods.

Contact Information for Further Support

For any safety inquiries or further support regarding the VLD Bullet Seating Micrometers, please refer to the manufacturer's website or customer service resources available in your region.

Thank you for your attention to these safety instructions. Your safety and satisfaction are our top priorities. Enjoy your reloading experience with the VLD Bullet Seating Micrometers!
