

STANDARD BULLET SEATING MICROMETERS - REDDING #23

STANDARD BULLET SEATING MICROMETER

[Reloading](#) > [Reloading Dies](#) > [Replacement Parts & Upgrades](#)

Redding Competition Seating Dies deliver the precision and accuracy preferred by the most discriminating handloaders. Now you can easily convert your conventional seating die to a precision micrometer seating die for use with STD (standard) bullets for precise, repeatable bullet seating depths to within 1/1000th of an inch and potential world-record accuracy. Designed for all seating dies that use a seat plug with 1/2-20 threads. Easily changes from one die to another, just match the number on your current seating plug to the corresponding bullet seating micrometer number. View Redding Micrometer Reference Chart here.

Safety Instruction Guide for Redding Standard Bullet Seating Micrometers

Introduction

Thank you for choosing the Redding Standard Bullet Seating Micrometers. This product is designed to enhance the precision and accuracy of bullet seating for handloaders. To ensure safe and effective use, please read this safety instruction guide carefully. It contains important information regarding safety guidelines, precautions, and proper usage.

General Safety Guidelines

- Ensure that you are familiar with the operation of reloading equipment before using this product.
- Always follow the manufacturer's instructions for both the micrometer and the seating die.
- Store the micrometer in a safe, dry place when not in use to prevent damage.
- Regularly inspect the micrometer for wear or damage before each use.
- Keep this product out of reach of children and vulnerable individuals.

Specific Safety Precautions for Use

- Use the micrometer only with compatible seating dies that accept a $\frac{1}{2}20$ thread seat plug.
- Avoid using excessive force when adjusting the micrometer to prevent damage.
- Do not attempt to modify or disassemble the micrometer.
- Always wear appropriate eye protection when reloading ammunition.
- Ensure that the work area is clean and free of any distractions while using the micrometer.

Instructions for Installation and Usage

1. Installation:

- Identify the seating die you will be using with the micrometer.
- Remove the current seat plug from the seating die.
- Match the number on your current seat plug with the corresponding bullet seating micrometer number.
- Install the micrometer into the seating die by threading it securely into place.

2. Usage:

- Adjust the micrometer to the desired bullet seating depth. This should be done carefully to ensure accuracy.
- Once the desired depth is set, proceed to seat the bullet using the die.
- After seating, check the bullet depth using a caliper to ensure it meets specifications.
- Repeat the process as necessary, making adjustments to the micrometer for different bullet types or seating depths.

Disposal Instructions

- Dispose of the micrometer in accordance with local regulations for electronic and metal waste.
- Do not dispose of the product in regular household waste.
- If the product is damaged beyond use, contact local recycling facilities for proper disposal methods.

Contact Information for Further Support

For any inquiries regarding safety or product support, please refer to the manufacturer's website or contact their customer service department. Ensure that you have the product information and any relevant details ready for assistance.

Conclusion

By following these safety instructions, you can ensure a safe and effective experience while using the Redding Standard Bullet Seating Micrometers. Always prioritize safety and refer to this guide whenever necessary. Thank you for your commitment to safe reloading practices.
