## Inserts Sold Separately

The Sinclair Two-Piece bore guide system helps the shooter get the best possible alignment of the cleaning rod to the bore by using a guide within a guide. The guide body goes into the action and seals the chamber with an O-ring, like a traditional bore guide. A separate guide slides into the rear of the guide body to provide a slip fit for the cleaning rod. The tight-fitting 8" insert prevents the rod from flexing and keeps it centered, so it will not contact the rifling while you clean. Choose the guide body to fit the cartridge your rifle is chambered for, then select the insert with the inside diameter that fits your rod. Both guide body and insert are machined from Delrin with rubber O-ring seals to prevent solvent from getting into the action. Bore guide bodies are made to fit the Remington 700 and other rifles with .700" diameter bolts.

## Instructions for Installation and Usage

### 1. Select the Appropriate Guide Body:

- Choose the guide body that fits the cartridge your rifle is chambered for.
- Ensure it is compatible with the Remington 700 or other rifles with .700" diameter bolts.

### 2. Insert the Guide Body:

- Insert the guide body into the action of the rifle.
- Ensure that the O-ring seals the chamber properly.

### 3. Attach the Guide Insert:

- Slide the appropriate guide insert into the rear of the guide body.
- Make sure the insert fits snugly to provide a slip fit for the cleaning rod.

### 4. Insert the Cleaning Rod:

- Carefully insert the cleaning rod into the guide insert.
- Ensure that the rod is centered and does not contact the rifling while cleaning.

### 5. Perform Cleaning:

- Proceed with the cleaning process, ensuring that you do not apply excessive force.

### 6. Remove the Cleaning Rod:

- Once cleaning is complete, carefully remove the cleaning rod from the guide insert.

#### **7. Disassemble the Guide:**

- Remove the guide insert and guide body from the rifle after use.
