

SINCLAIR COMPETITION SHOOTING REST NON-WINDAGE - SINCLAIR INTERNATIONAL ALL-PURPOSE COMPETITION SHOOTING REST NON-WINDAGE

[Shooting Accessories](#) > [Shooting Rests](#) > [Shooting Rest Accessories](#)

The Sinclair Competition Shooting Rest is a result of our staff and our customer's years of shooting experience on the firing line, and in the field. We've incorporated the best design ideas, materials, and craftsmanship to present you with a shooting platform that rivals any windage rest available today. Whether you're competing in a benchrest discipline, F-Class, or wringing the most accuracy from your favorite shooting rig, the Sinclair Competition Rest offers the most versatile fit, function, and features in one complete package. Do not work with the 749-013-833 speed screw on the Sinclair Competition Rests. NOTE: You will need to order a front bag in addition to the rest. We recommend the Protector Leather/Cordura or the Edwood Standard Front Bags. Heavy and Compact The Sinclair Competition Rest's foundation begins with a one inch, solid steel base plate with a durable granite powder coat finish. This enables us to achieve a massive unit - over 30 pounds - with the lowest center of gravity, combined with a footprint that's no larger than other tripod rests currently on the market. It's nearly twice as heavy as our closest competitor. Mobile Most shooting rests by design, are awkward and difficult to manage and maneuver. We solved this by machining a carry handle into the base plate for easy transport, making the Sinclair Competition Rest one of the most mobile units available, in spite of its enormous weight. No tacky looking handles or impossible two-arm lift methods are needed. Effortless Operation The Sinclair Competition Rest has the windage operation built directly into the base plate. It incorporates dual sets of twin tapered roller bearings for an effortless, non-binding windage operation. The oversized windage control knob is positioned near the rear speed screw where simultaneous one-handed adjustment is easily achievable. Nearly four feet of windage adjustment is offered at 100 yards - enough for any bench shooting discipline. The oversized, fluted handwheel also offers smooth vertical adjustment with the aid of a thrust bearing. A non-windage-adjustable model is available for shooters who prefer to adjust windage off the rear bag or do not have a need for the windage adjustable base block. Ambidextrous Design The unique construction of this windage unit platform enables an entirely ambidextrous set-up for right or left handed shooters. The post, center column, controls and windage adjustment disassemble and reassemble on the opposite side, for a completely mirrored, left hand use. Hardware for Hard Wear The Sinclair Competition Rest includes upgraded hardware: a beefed up center column (1.95" up from 1.375"); threaded post (1" diameter up from 3/4"); leg screws (1/2" diameter up from 3/8"); and large diameter fluted speed screw - all made from high grade stainless steel to withstand a lifetime of abuse. All knob controls and handwheel are machined from aluminum then anodized or powder coated to provide a durable grip surface for all adjustments. Topping Perfection The Sinclair Competition Rest is completed with our Benchrest Top with new lockable forend stop assembly. Our Benchrest Top accepts both Edgewood and Protektor front bags in sporter, varmint, and benchrest configurations. The new lockable forend stop unit is adjustable for length (fore-aft), height, and cant. Our benchrest top is both NBRSA and IBS approved for competition shooting. The Sinclair Competition Rest is also available with our All-Purpose Top which features our updated Sinclair designed Edgewood Bag, easy adjust lockable bag ears and

new forend stop. This top is an excellent choice for all Rimfire Benchrest competitions, particularly Sporter Rifle Class, as well as those wishing to attain the highest level of accuracy from all of their rifles. Accessories The Sinclair Competition Rest includes mounting holes for aftermarket accessories you may wish to entertain. Such as our Port Level Ammo Block which enables the shooter to adjust their tray of 20 rounds of PPC or BR wherever needed. Move it close to your rifle port for fast shooting.

Attributes

- Name: [SINCLAIR INTERNATIONAL ALL-PURPOSE COMPETITION SHOOTING REST NON-WINDAGE](#)

Sinclair Competition Shooting Rest Safety Instructions

Introduction

Thank you for choosing the Sinclair Competition Shooting Rest. This product is designed to provide you with a stable and versatile shooting platform. To ensure your safety and the proper use of this product, please read the following safety instructions carefully. This guide complies with the EU General Product Safety Regulation (GPSR) and is designed to help you use the product safely and effectively.

General Safety Guidelines

- Always ensure that the shooting rest is placed on a stable and flat surface before use.
- Do not exceed the recommended weight limit of the shooting rest.
- Regularly inspect the shooting rest for any signs of wear or damage before each use.
- Keep the shooting rest away from children and unauthorized users.
- Use the shooting rest only for its intended purpose.
- Follow all local laws and regulations regarding the use of shooting equipment.

Specific Safety Precautions for Use

- **Weight Considerations:** The Sinclair Competition Rest is a heavy unit (over 30 pounds). Ensure you have a firm grip when moving or adjusting the rest to prevent injury.
- **Windage Adjustment:** Do not use the speed screw (749013833) on the Sinclair Competition Rests. Adjustments should be made using the designated controls.
- **Ambidextrous Setup:** When switching the setup for lefthanded use, ensure all components are securely fastened and properly aligned before use.
- **Hardware Inspection:** Check all knobs, handles, and screws for tightness and integrity before each use to prevent malfunction during operation.

Instructions for Installation and Usage

1. Unpacking the Rest:

- Carefully remove the Sinclair Competition Shooting Rest from its packaging.
- Inspect all components to ensure nothing is damaged or missing.

2. Setting Up the Rest:

- Place the rest on a flat, stable surface.
- Ensure that the base plate is secure and level.
- If using a front bag, attach it securely according to the manufacturer's instructions.

3. Adjusting for Use:

- For windage adjustments, use the oversized windage control knob located near the rear speed screw.
- Ensure that all adjustments are made smoothly and without force.
- For vertical adjustments, use the fluted handwheel, ensuring it operates freely.

4. Using the Rest:

- Position your rifle securely on the rest.

- Ensure that the rifle is stable and that the rest is not obstructing the rifle's operation.
- Follow all safety protocols for shooting, including wearing appropriate eye and ear protection.

5. PostUse Care:

- After use, clean the rest to remove any debris or moisture.
- Store the rest in a dry place to avoid rust and deterioration.

Disposal Instructions

When disposing of the Sinclair Competition Shooting Rest, please follow these guidelines:

- Do not dispose of the product in regular household waste.
- Check local regulations for the disposal of metal and plastic materials.
- If applicable, recycle components such as metal and plastic according to local recycling programs.

Contact Information for Further Support

For any safety inquiries or support regarding the Sinclair Competition Shooting Rest, please refer to the contact information provided with your product or visit the manufacturer's website.

By following these safety instructions, you can ensure a safe and enjoyable experience with your Sinclair Competition Shooting Rest. Always prioritize safety and adhere to all guidelines to protect yourself and others. Thank you for choosing Sinclair International!
