

BOSS II PRO-PAK - REDDING BIG BOSS II PRO-PAK

[Reloading](#) > [Reloading Kits](#)

The Redding Pro Pak has been the perfect beginning for generations of America's most successful handloaders. Previously, this kit was available with either a Boss or Big Boss Press. For 2013, the Pro Pak family has gained a new member. The Redding Pro Pak is now offered with the highly respected Big Boss II press. This 100% American made press features a high density, tight grain structure cast iron frame produced to Redding's specific formulation at a family-owned Pennsylvania foundry. All Big Boss II components are CNC machined and individually hand fitted in Redding's Cortland NY facility. All of which, assures decades of precise and reliable function even on big cases and tough forming jobs. The Big Boss II also features a unique spent primer removal system, which drops the primer and associated debris straight down through the center of ram and into a captive tube below the press. This keeps dirt, grime and other spurious matter away from the interface of the press frame and ram, thereby protecting the critical surfaces from unnecessary wear and tear during use. The new Big Boss II Pro Pak continues the tradition of a great start into handloading with all of the basic tools needed to build a first loading bench with durable, quality tools in one box at a price which is discounted off the individual pieces. Redding Reloading Equipment has focused on building the finest quality American Made products for the precision handloading market since 1946.

Safety Instruction Guide for BOSS II PROPAK REDDING BIG BOSS II PROPAK

Introduction

Thank you for choosing the BOSS II PROPAK REDDING BIG BOSS II PROPAK. This product is designed for safe and effective handloading. Please read this safety instruction guide carefully to ensure safe use and compliance with EU safety regulations.

General Safety Guidelines

- Always read and understand the user manual before using the product.
- Ensure the workspace is clean, dry, and welllit.
- Keep the product out of reach of children and vulnerable individuals.
- Use the product only for its intended purpose.
- Regularly inspect the equipment for any signs of wear or damage.
- Always wear appropriate personal protective equipment (PPE) such as safety glasses and gloves when using this product.
- Follow local regulations for the handling and storage of reloading materials.

Specific Safety Precautions for Use

- Ensure that the press is securely mounted to a stable surface before use.
- Do not exceed the manufacturer's recommended load limits.
- Always check for obstructions in the ram and die before operation.
- Avoid placing hands or any body parts near moving parts during operation.
- Use only the recommended components and tools as specified in the manual.
- If you notice any unusual noises or malfunctions, stop using the product immediately and consult the manual or a qualified technician.

Instructions for Installation and Usage

1. Installation

- Choose a sturdy and stable workbench for mounting the press.
- Use bolts to securely attach the press to the workbench, ensuring it is level and stable.
- Check that all components are present and undamaged before assembly.

2. Usage

- Familiarize yourself with the parts of the press and their functions.
- Always ensure that the ram is in the fully raised position before inserting cases.
- Follow the specific instructions for adjusting the dies and setting up the press as outlined in the manual.
- After each loading session, clean the press to remove any debris or residue.

Disposal Instructions

- Dispose of any packaging materials in accordance with local waste disposal regulations.
- When the product reaches the end of its life, ensure that it is disposed of in an environmentally friendly manner. Check local regulations for electronic waste and metal recycling.
