## MICRO-ADJUST BULLET SEATING DIE 6MM CREEDMOOR

[Reloading](#) > [Reloading Dies](#) > [Rifle Dies](#)

We gathered our customers ideas and reloading experience with hand dies, and partnered with the experts who make them, to introduce the new Sinclair/L.E. Wilson Micro-Adjust Bullet Seater. It features easy-adjust seating depth capabilities with a simple turn of the die body. Sinclair/L.E. Wilson Micro-Adjust Bullet Seaters are detent-bearing driven with positive "click" increments of .0005" for fast, accurate bullet seating depth adjustments. Here are the details of construction: Each seater stem is custom fitted to the seater body ensuring close tolerance fit Precision-cut threads allow bullet seating depth adjustment in .0005" increments Graduated scale for repeated use with different bullets and seating depths Micro-Adjust "clicks" via stainless springs and stainless ball bearings Constructed of 416 Stainless Steel with precise, laser-etched adjustment scale Made in the USA by L.E. Wilson with 85 years of inline die experience We feel these dies are the finest available in terms of quality, construction, and performance.

# Safety Instruction Guide for MICROADJUST BULLET SEATERS

## Introduction

Thank you for choosing the Sinclair International MicroAdjust Bullet Seating Die for your reloading needs. This guide provides essential safety instructions and guidelines to ensure the safe and effective use of this product. Please read this document carefully before use.

## General Safety Guidelines

- Ensure that the product is used in accordance with the manufacturer's instructions to avoid potential hazards.
- Always wear appropriate safety gear, including safety glasses and hearing protection, when using reloading equipment.
- Keep the product out of reach of children and unauthorized users.
- Regularly inspect the die for any signs of wear or damage before use.
- Report any unsafe conditions or accidents to the appropriate authorities.

## Specific Safety Precautions for Use

- Use the die only with compatible cartridges as specified in the product description.
- Avoid using excessive force when adjusting the seating depth to prevent damage to the die or injury.
- Ensure that the workspace is clean and free of obstructions to prevent accidents.
- Do not modify the die or use it for any purpose other than intended.
- Always follow proper reloading practices, including verifying powder charges and bullet weights.

## Instructions for Installation and Usage

### 1. Installation:

- Ensure that your reloading press is compatible with the Sinclair International MicroAdjust Bullet Seating Die.
- Securely mount the die in the reloading press according to the manufacturer's guidelines.
- Check that the die is properly aligned and tightened to prevent movement during operation.

### 2. Usage:

- Adjust the seating depth by turning the die body clockwise or counterclockwise. Each adjustment will yield a change of .0005".
- Use the graduated scale for consistent depth settings when switching between different bullets.
- After making adjustments, perform a test seating with a dummy round to verify the desired depth before proceeding with actual reloading.
- Always maintain a clean working environment and ensure that the die is free of debris before and after use.

## Disposal Instructions

- Dispose of any packaging materials in accordance with local regulations.
- If the die is damaged or no longer usable, contact local waste management services to determine the appropriate disposal method.
- Do not dispose of the die in regular household waste if it contains hazardous materials.

## **Contact Information for Further Support**

For any inquiries regarding product safety or to report unsafe conditions, please refer to the relevant authorities or visit the EU Safety Gate platform for updates on recalls and safety alerts.

Thank you for your attention to these safety guidelines. Your safety and satisfaction are our top priorities.
