

COMPETITION SEATER DIES - REDDING 300 AAC BLACKOUT BULLET SEATING DIE

[Reloading](#) > [Reloading Dies](#) > [Rifle Dies](#)

We feel the Redding Competition Bullet Seater is the best bullet 7/8-14 bullet seater on the market today. The machining is precise, and the sliding chamber is the smoothest we have ever experienced in a seater. This micrometer-adjustable die is calibrated in .001"" increments for precise seating depth adjustments and is infinitely adjustable (no clicks). It also has a zero set feature that allows you to zero the micrometer to your favorite seating depth. Sold separately or as part of a set. Also available for handgun and straight wall cartridges.

Safety Instruction Guide for Competition Seater Dies Redding 300 AAC Blackout Bullet Seating Die

Introduction

Thank you for choosing the Competition Seater Dies Redding 300 AAC Blackout Bullet Seating Die. This product is designed for precision bullet seating and is manufactured to meet high safety and quality standards. Please read this safety instruction guide carefully to ensure safe and effective use of the product.

General Safety Guidelines

- Always use the product according to the manufacturer's instructions to ensure safe operation.
- Keep the product out of reach of children and vulnerable individuals.
- Regularly inspect the product for any signs of damage or wear before use.
- Report any unsafe conditions or accidents to the appropriate authorities.
- Stay informed about recall updates via the EU's Safety Gate platform.

Specific Safety Precautions for Use

- Ensure that the die is securely attached to the reloading press before use.
- Always wear appropriate personal protective equipment (PPE), such as safety glasses, when using the die.
- Handle all components with care to avoid injury or damage.
- Do not exceed the recommended specifications for the die, including cartridge type and seating depth.
- Be aware of the potential hazards associated with reloading ammunition and follow safe reloading practices.

Instructions for Installation and Usage

1. Installation:

- Carefully unpack the die and all included components.
- Ensure that your reloading press is clean and free from debris.
- Attach the bullet seating die to the reloading press using the standard 7/814 thread.
- Tighten the die securely but avoid overtightening, which could damage the threads.

2. Usage:

- Set the micrometer to your desired seating depth by turning the adjustment knob. The die is calibrated in .001" increments for precision.
- Insert the cartridge case into the reloading press and ensure it is properly aligned.
- Place a bullet into the case mouth and lower the press handle to seat the bullet.
- Check the seating depth after each adjustment to ensure accuracy.
- If needed, use the zero set feature to return the micrometer to your preferred seating depth.

Disposal Instructions

- Dispose of the product according to local regulations for hazardous materials.
- Do not dispose of the product in regular household waste.
- If the product is damaged or no longer usable, contact local waste management services for proper disposal methods.

Contact Information for Further Support

For any questions or concerns regarding the safety and use of this product, please refer to the manufacturer's contact information provided on the packaging or product documentation.
