

MICROMETER SEATER DIES - WHIDDEN GUNWORKS 6MM BR BULLET SEATER DIE

[Reloading](#) > [Reloading Dies](#) > [Rifle Dies](#)

For precise, consistent OAL handloads, the internals of the Whidden Seater Die are designed to keep your rounds Round. Inside the die is a floating sleeve system helps to improve concentricity – a must for repeatable precision. The Micrometer Adjustable Seating Die has flutes for precise hand adjustment at the loading bench. The depth increments are easily read and will stay that way for years of use.

MICROMETER SEATER DIES WHIDDEN GUNWORKS

6MM BR BULLET SEATER DIE Safety Instruction Guide

Introduction

Thank you for choosing the Whidden Gunworks 6mm BR Bullet Seater Die. This guide provides essential safety instructions to ensure the safe and effective use of this product. Please read this guide thoroughly before using the die.

General Safety Guidelines

- Always use the die in accordance with the manufacturer's instructions.
- Ensure that you are familiar with the operation of reloading equipment before use.
- Keep the die out of reach of children and unauthorized users.
- Inspect the die for any damage or defects before each use.
- Use protective eyewear when operating reloading equipment.
- Store the die in a dry, safe place when not in use.
- Report any unsafe conditions or accidents to the relevant authorities.

Specific Safety Precautions for Use

- Ensure that the working area is clean and free from distractions.
- Do not exceed the recommended load data for the 6mm BR cartridge.
- Be cautious of the potential for lead exposure when handling bullets.
- Use only compatible components when reloading ammunition.
- Do not modify the die or any related equipment.
- Ensure that the die is securely mounted to the loading bench before use.
- Always use the micrometer adjustments carefully to avoid overtightening.

Instructions for Installation and Usage

Installation

1. Mounting the Die:

- Securely attach the die to your reloading press according to the manufacturer's instructions.
- Ensure that the die is properly aligned for optimal performance.

2. Setting Up the Micrometer:

- Adjust the micrometer to the desired seating depth using the flutes for precise hand adjustment.
- Lock the micrometer in place to maintain the setting during use.

Usage

1. Loading Procedure:

- Prepare your cases according to standard reloading practices.
- Insert the bullet into the case mouth and position it under the die.
- Gently lower the press handle to seat the bullet to the desired depth.

2. **Adjusting Settings:**

- After each round, check the seating depth and make adjustments as necessary using the micrometer.
- Keep track of your settings for consistency in future loads.

3. **PostUse Care:**

- Clean the die after use to prevent corrosion and maintain accuracy.
- Store the die in its original packaging or a dedicated storage case.

Disposal Instructions

- Dispose of any unused or defective components in accordance with local regulations.
- Do not dispose of lead or other hazardous materials in regular trash.
- Check with local waste management authorities for proper disposal methods.

Contact Information for Further Support

For any inquiries or concerns regarding the safety and operation of the Whidden Gunworks 6mm BR Bullet Seater Die, please refer to the manufacturer's contact details provided with your product.

Conclusion

By following these safety instructions, you can ensure a safe and effective reloading experience with the Whidden Gunworks 6mm BR Bullet Seater Die. Always prioritize safety and compliance with the EU General Product Safety Regulation (GPSR) while using this product. Thank you for your attention to these important safety guidelines.
