

# MICROMETER TOP BULLET SEATER DIES BLANKS - L.E. WILSON

## 6MM STAINLESS MICROMETER TOP SEATER DIE BLANK

[Reloading](#) > [Reloading Dies](#) > [Rifle Dies](#)

The L.E.Wilson Stainless Steel Micrometer Top Seater Dies positively controls both bullet and cartridge case alignment. The case and bullet are completely captured by the die prior to the bullet being pushed straight into the case by a close-fitting seating stem. This style of bullet seater works more accurately than a conventional (7/8"-14) bullet seating die. The stainless seaters have a built in micrometer seating depth adjustment feature with an easy to read scale in .001 graduations. These die blanks allow the reloader to have a custom die made to their exact dimensions or for wildcat cartridges.

**\*\*To be used with an Arbor Press\*\***

# Safety Instruction Guide for L.E. Wilson Stainless Steel Micrometer Top Bullet Seater Die Blanks

## Introduction

Thank you for choosing the L.E. Wilson Stainless Steel Micrometer Top Bullet Seater Die Blanks. This product is designed to provide precise control over bullet and cartridge case alignment during reloading. To ensure safe and effective use, please read and follow these safety instructions carefully.

## General Safety Guidelines

- Ensure that the product is used in accordance with the manufacturer's instructions.
- Always wear appropriate personal protective equipment (PPE), including safety glasses and gloves, when handling reloading equipment.
- Keep the product out of reach of children and unauthorized users.
- Regularly inspect the die for any signs of wear or damage before use.
- Store the die in a dry and secure location when not in use.
- Report any unsafe products or accidents to the relevant authorities.

## Specific Safety Precautions for Use

- Always use the die with an Arbor Press to ensure proper operation.
- Do not exceed the recommended seating depth adjustments.
- Avoid using excessive force when seating bullets to prevent damage to the die or cartridge.
- Ensure that the bullet and cartridge case are correctly aligned before seating.
- Do not attempt to modify or alter the die in any way.
- Be aware of the potential hazards associated with reloading ammunition, including the risk of explosion or injury.

## Instructions for Installation and Usage

### 1. Preparation

- Gather all necessary equipment, including the L.E. Wilson Micrometer Top Seater Die, Arbor Press, and reloading components (bullets and cartridge cases).
- Ensure a clean and organized workspace.

### 2. Installation

- Secure the die into the Arbor Press according to the manufacturer's instructions.
- Adjust the micrometer seating depth to the desired setting, using the easytoread scale in .001 graduations.

### 3. Usage

- Place the cartridge case into the die, ensuring it is correctly aligned.
- Insert the bullet into the case.
- Gently lower the Arbor Press handle to push the bullet into the case.
- Monitor the alignment and pressure applied to avoid damaging the die or components.
- After seating, remove the cartridge from the die and inspect for proper seating depth.

## **Disposal Instructions**

- Dispose of any unused or damaged components in accordance with local regulations.
- Do not dispose of ammunition or reloading components in regular household waste.
- Contact local authorities for proper disposal methods for hazardous materials.

## **Contact Information for Further Support**

For any inquiries or concerns regarding the L.E. Wilson Stainless Steel Micrometer Top Bullet Seater Die Blanks, please refer to the manufacturer's contact details provided with your product packaging.

Thank you for your attention to these safety guidelines. Your safety is our priority. Happy reloading!
