

MICROMETER TOP BULLET SEATER DIES BLANKS - L.E. WILSON

7MM STAINLESS MICROMETER TOP SEATER DIE BLANK

[Reloading](#) > [Reloading Dies](#) > [Rifle Dies](#)

The L.E.Wilson Stainless Steel Micrometer Top Seater Dies positively controls both bullet and cartridge case alignment. The case and bullet are completely captured by the die prior to the bullet being pushed straight into the case by a close-fitting seating stem. This style of bullet seater works more accurately than a conventional (7/8"-14) bullet seating die. The stainless seaters have a built in micrometer seating depth adjustment feature with an easy to read scale in .001 graduations. These die blanks allow the reloader to have a custom die made to their exact dimensions or for wildcat cartridges.

****To be used with an Arbor Press****

Safety Instruction Guide for L.E. Wilson Stainless Steel Micrometer Top Seater Die Blanks

Introduction

Thank you for choosing the L.E. Wilson Stainless Steel Micrometer Top Seater Die Blanks. These die blanks are designed for precision reloading and are compatible with a variety of cartridges. This safety instruction guide provides essential information to ensure safe and effective use of the product, in compliance with the EU General Product Safety Regulation (GPSR).

General Safety Guidelines

- Always read and understand the safety instructions before using the product.
- Ensure that the workspace is clean and free from obstructions to prevent accidents.
- Use personal protective equipment (PPE) such as safety glasses and gloves when handling reloading materials.
- Keep the product out of reach of children and unauthorized users.
- Report any unsafe conditions or accidents to the appropriate authorities.
- Regularly check for product recalls and safety updates on the EU's Safety Gate platform.

Specific Safety Precautions for Use

- Use the die blanks only with an Arbor Press as specified.
- Ensure that the bullet and cartridge case are properly aligned before seating.
- Do not exceed the recommended seating depth adjustments.
- Avoid using the product under extreme temperatures or in damp environments.
- Inspect the die blanks for any signs of damage or wear before each use.
- Do not modify the die blanks in any way, as this may compromise safety and functionality.

Instructions for Installation and Usage

1. Installation:

- Secure the Arbor Press on a stable work surface.
- Insert the die blank into the Arbor Press, ensuring it is firmly in place.
- Adjust the seating stem according to the desired bullet seating depth using the micrometer feature.

2. Usage:

- Place the cartridge case in the die blank.
- Position the bullet on top of the cartridge case.
- Gradually apply pressure to the Arbor Press to push the bullet into the cartridge case.
- Monitor the seating depth using the micrometer scale, making adjustments as necessary.
- After use, clean the die blanks to remove any residue and maintain functionality.

Disposal Instructions

- Dispose of any unused or damaged die blanks in accordance with local regulations.
- Do not dispose of the product in household waste. Instead, check for recycling options in your area.
- Ensure that all packaging materials are disposed of responsibly, following recycling guidelines.

Contact Information for Further Support

For any inquiries regarding the safety or use of the L.E. Wilson Stainless Steel Micrometer Top Seater Die Blanks, please consult with your local distributor or retailer. They can provide further assistance and information regarding the product.

By following these safety guidelines and instructions, you can ensure a safe and effective reloading experience. Thank you for your attention to safety and for choosing our product.
