## STANDARD BULLET SEATING MICROMETER

[Reloading](#) > [Reloading Dies](#) > [Replacement Parts & Upgrades](#)

Redding Competition Seating Dies deliver the precision and accuracy preferred by the most discriminating handloaders. Now you can easily convert your conventional seating die to a precision micrometer seating die for use with STD (standard) bullets for precise, repeatable bullet seating depths to within 1/1000th of an inch and potential world-record accuracy. Designed for all seating dies that use a seat plug with ½-20 threads. Easily changes from one die to another, just match the number on your current seating plug to the corresponding bullet seating micrometer number. View Redding Micrometer Reference Chart [here](#).

# Safety Instruction Guide for STANDARD BULLET SEATING MICROMETERS REDDING #11

## Introduction

Thank you for choosing the Redding #11 Standard Bullet Seating Micrometer. This product is designed for precision bullet seating, ensuring accuracy for handloaders. To ensure safe use and optimal performance, please read and follow these safety instructions carefully.

## General Safety Guidelines

- Always read the product manual before use.
- Ensure that the micrometer is compatible with your seating die before installation.
- Keep the micrometer and all components out of reach of children.
- Use the product only for its intended purpose.
- Regularly inspect the micrometer for any signs of damage or wear.
- Report any unsafe conditions or incidents to the appropriate authorities.
- Stay informed about product recalls through the EU Safety Gate platform.

## Specific Safety Precautions for Use

- Use protective eyewear when operating the micrometer to prevent eye injury.
- Ensure the work area is clean and free of any obstructions.
- Do not exceed the recommended bullet seating depth.
- Avoid using excessive force when adjusting the micrometer.
- Do not modify the micrometer or its components.
- Store the micrometer in a dry place to prevent corrosion.

## Instructions for Installation and Usage

### 1. Installation:

- Ensure the seating die is clean and free from debris.
- Remove the existing seat plug from your seating die.
- Match the number on your current seating plug to the corresponding micrometer number.
- Screw the micrometer into the seating die using the 1/20 threads until secure.

### 2. Usage:

- Adjust the micrometer to the desired bullet seating depth.
- Place the bullet in the seating die and lower the ram to seat the bullet.
- Check the seating depth using a caliper for accuracy.
- Repeat the process as necessary, ensuring consistent adjustments.

## Disposal Instructions

- Dispose of the micrometer and any components in accordance with local waste disposal regulations.
- Do not dispose of the product in household waste; check for recycling options.

## Contact Information for Further Support

For any questions or concerns regarding the use of this product, please consult the manufacturer's website or

contact their customer support for assistance.

By following these guidelines, you can ensure safe and effective use of the Redding #11 Standard Bullet Seating Micrometer. Thank you for your attention to safety!
