

STANDARD BULLET SEATING MICROMETERS - REDDING #12

STANDARD BULLET SEATING MICROMETER

[Reloading](#) > [Reloading Dies](#) > [Replacement Parts & Upgrades](#)

Redding Competition Seating Dies deliver the precision and accuracy preferred by the most discriminating handloaders. Now you can easily convert your conventional seating die to a precision micrometer seating die for use with STD (standard) bullets for precise, repeatable bullet seating depths to within 1/1000th of an inch and potential world-record accuracy. Designed for all seating dies that use a seat plug with 1/2-20 threads. Easily changes from one die to another, just match the number on your current seating plug to the corresponding bullet seating micrometer number. View Redding Micrometer Reference Chart here.

Safety Instruction Guide for Redding Standard Bullet Seating Micrometers

Introduction

Thank you for choosing the Redding Standard Bullet Seating Micrometer. This product is designed to enhance your reloading experience by providing precise and repeatable bullet seating depths. To ensure your safety and the effective use of this product, please read and follow the guidelines outlined in this manual.

General Safety Guidelines

- Always read the product instructions carefully before use.
- Use the micrometer only for its intended purpose.
- Ensure that the work area is clean and free of distractions.
- Keep the micrometer out of reach of children and pets.
- Wear appropriate safety gear, such as safety glasses, when using reloading equipment.
- Inspect the micrometer regularly for any signs of wear or damage.
- Report any unsafe products or accidents to the relevant authorities.

Specific Safety Precautions for Use

- Ensure that the micrometer is compatible with your seating die before installation.
- Avoid applying excessive force when adjusting the micrometer to prevent damage.
- Do not use the micrometer if it appears to be damaged or malfunctioning.
- Keep fingers and hands clear of moving parts during operation.
- Use the micrometer in a wellventilated area to avoid inhaling any potential dust or particles.
- Follow all local laws and regulations regarding ammunition reloading.

Instructions for Installation and Usage

1. Compatibility Check:

- Confirm that your seating die uses a seat plug with $\frac{1}{2}20$ threads.
- Match the number on your current seating plug to the corresponding bullet seating micrometer number.

2. Installation:

- Remove the existing seating plug from your die.
- Carefully screw the Redding Standard Bullet Seating Micrometer into the die until secure.
- Ensure that the micrometer is properly aligned and tightened to avoid any movement during use.

3. Adjusting the Micrometer:

- To set bullet seating depth, rotate the micrometer dial to the desired measurement.
- Use the fine adjustment feature for precise settings, ensuring that you do not exceed the recommended depth.

4. Testing:

- After adjustment, perform a test seating with a dummy round to verify accuracy.
- Make any necessary adjustments based on the test results.

5. Maintenance:

- Clean the micrometer after each use to remove any debris or residue.
- Store the micrometer in a dry, safe place to prevent damage.

Disposal Instructions

- Dispose of any nonfunctional or damaged micrometers in accordance with local regulations.
- Do not dispose of the micrometer in regular household waste.
- Check with local recycling centers for proper disposal methods for metal and plastic components.

Contact Information for Further Support

For any inquiries or support regarding the Redding Standard Bullet Seating Micrometer, please refer to the manufacturer's contact details provided on the packaging or the official website.

By following these safety instructions, you can ensure a safe and effective reloading experience with the Redding Standard Bullet Seating Micrometer. Thank you for prioritizing safety while enjoying your hobby.
