

# FLAT BULLET SEATING MICROMETER - REDDING #17 FLAT BULLET SEATING MICROMETER

[Reloading](#) > [Reloading Dies](#) > [Replacement Parts & Upgrades](#)

Redding Bullet Seating Micrometers are for use with most standard Redding Seating Dies and provide a direct replacement for the original seat plug. They provide a direct replacement for the original seat plugs and can easily be changed from one die to another. Redding Bullet Seating Micrometers for bottleneck cartridges are available for traditional bullet shapes (STD) and for VLD bullet shapes (VLD). They are also available for handgun and straight wall cartridges with traditional bullet shapes (STD) and flat nose bullet designs (FLAT).

# Safety Instruction Guide for FLAT BULLET SEATING MICROMETER REDDING #17

## Introduction

Thank you for choosing the Redding Flat Bullet Seating Micrometer. This guide provides essential safety instructions and recommendations for the safe use, installation, and disposal of the product. Please read this document carefully to ensure safe operation and compliance with EU safety regulations.

## General Safety Guidelines

- Ensure that the product is used in accordance with the manufacturer's instructions.
- Always inspect the micrometer for any signs of damage before use.
- Store the micrometer in a dry and safe place when not in use to prevent damage.
- Keep the micrometer out of reach of children and vulnerable individuals to prevent accidental injury.
- Report any unsafe product experiences or accidents to the relevant authorities.

## Specific Safety Precautions for Use

- Use the micrometer only with compatible Redding Seating Dies.
- Avoid using the micrometer if it appears damaged or malfunctioning.
- Do not apply excessive force when adjusting the seating depth to prevent damage to the micrometer.
- Always wear appropriate safety gear, such as safety glasses, when using reloading equipment.
- Ensure a clean working environment to avoid contamination of the micrometer and cartridges.

## Instructions for Installation and Usage

### 1. Installation:

- Ensure that the Redding Seating Die is securely mounted in your reloading press.
- Remove the original seat plug from the die by unscrewing it counterclockwise.
- Carefully insert the Redding Flat Bullet Seating Micrometer into the die, ensuring it is seated properly.
- Tighten the micrometer in place by screwing it clockwise until secure.

### 2. Usage:

- Adjust the seating depth by turning the micrometer knob. Clockwise rotation increases seating depth, while counterclockwise rotation decreases it.
- Test the seating depth with a sample cartridge before proceeding with full reloading to ensure accuracy.
- Regularly check the micrometer's setting during use to maintain consistent seating depth.

## Disposal Instructions

- Dispose of the product in accordance with local regulations regarding electronic waste and metal recycling.
- Do not dispose of the micrometer in household waste. Contact local waste management authorities for proper disposal methods.
- If the micrometer is damaged beyond repair, ensure it is disposed of safely to prevent injury.

## **Contact Information for Further Support**

For any questions or concerns regarding the Redding Flat Bullet Seating Micrometer, please refer to the manufacturer's contact information provided on the packaging or official website.

By adhering to these safety instructions, you can ensure a safe and effective experience with your Redding Flat Bullet Seating Micrometer. Thank you for your attention to these important guidelines.
