

# WILSON CASE GAGE - L.E. WILSON 25-45 SHARPS CASE GAGE

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

The most important use of a cartridge case gage is for setting up 7/8"-14 press type full length resizing dies. A common error in reloading is to oversize your brass. Headspace of fired cases can quickly and accurately be measured using this tool and a caliper. Regular Style: This one piece gage will check overall length to indicate a need for trimming and datum to head length to assure correct headspace to prevent over sizing. Adjustable Style: For belted mags. While the belt provides support for proper headspace, the life of the case will drastically shorten unless resizing is held to a minimum at the shoulder. SPECIAL ORDER CASE GAGES ARE AVAILABLE---MEASURE CASE LENGTH ONLY

## Attributes

- Name: [L.E. WILSON 25-45 SHARPS CASE GAGE](#)
- Manufacturer: [L.E. WILSON](#)
- Product no.: 749017469
- Mfr. No.: CG-2545S
- Cartridge: 25-45 Sharps
- Delivery weight: 0.204kg
- Shipping height: 32mm
- Shipping width: 32mm
- Shipping length: 85mm
- UPC: 815145027238

# WILSON CASE GAGE L.E. WILSON 2545 SHARPS CASE GAGE Safety Instruction Guide

## Introduction

Thank you for choosing the WILSON CASE GAGE L.E. WILSON 2545 SHARPS CASE GAGE. This guide provides essential safety instructions to ensure the proper use and handling of this product. Please read this guide carefully before using the case gage to ensure a safe and effective experience.

## General Safety Guidelines

- Always use the case gage in accordance with the manufacturer's instructions.
- Ensure that the gage is free from dirt and debris before use.
- Inspect the gage for any signs of damage or wear before each use.
- Keep the gage out of reach of children and vulnerable individuals.
- Report any unsafe conditions or incidents to the appropriate authorities.
- Stay informed about product recalls and safety updates through the EU Safety Gate platform.

## Specific Safety Precautions for Use

- **Hazard Identification:**
  - Improper use of the case gage may lead to oversizing of brass, resulting in unsafe ammunition.
  - Failure to measure headspace accurately can lead to dangerous malfunctions.
- **Avoiding Hazards:**
  - Always measure fired cases with a caliper to ensure accurate readings.
  - Do not attempt to resize cases without first checking the headspace.
  - Avoid using the gage in wet or damp conditions, as this may affect its accuracy.
- **AgeSpecific Warnings:**
  - This product is intended for use by individuals who are knowledgeable in reloading and ammunition handling.
  - Keep the gage away from children and untrained individuals.

## Instructions for Installation and Usage

- **Setting Up the Gage:**
  - Ensure that the gage is clean and free of obstructions.
  - For the Regular Style, check the overall length to determine if trimming is necessary.
  - For the Adjustable Style, ensure that the gage is properly adjusted for belted magnum cases.
- **Measuring Cases:**
  - Use a caliper to measure the headspace of fired cases accurately.
  - Align the case in the gage and check for proper fit.
  - If the case does not fit correctly, assess if resizing is needed to avoid oversizing.
- **Maintenance:**

- Store the gage in a dry, safe place when not in use.
- Regularly clean the gage with a soft cloth to remove any debris or residue.

## **Disposal Instructions**

- Dispose of the case gage responsibly in accordance with local waste management regulations.
- If the gage is damaged beyond repair, consider recycling materials where possible.

## **Contact Information for Further Support**

For any inquiries regarding safety or usage of the WILSON CASE GAGE L.E. WILSON 2545 SHARPS CASE GAGE, please refer to the manufacturer's contact details provided with the product packaging or on the official website.

Thank you for your attention to these safety instructions. Your safety and the safety of others depend on the proper use and handling of the WILSON CASE GAGE L.E. WILSON 2545 SHARPS CASE GAGE.
