

WILSON CASE GAGE - L.E. WILSON 26 NOSLER/28 NOSLER CASE GAGE

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

The most important use of a cartridge case gage is for setting up 7/8"-14 press type full length resizing dies. A common error in reloading is to oversize your brass. Headspace of fired cases can quickly and accurately be measured using this tool and a caliper. Regular Style: This one piece gage will check overall length to indicate a need for trimming and datum to head length to assure correct headspace to prevent over sizing. Adjustable Style: For belted mags. While the belt provides support for proper headspace, the life of the case will drastically shorten unless resizing is held to a minimum at the shoulder. SPECIAL ORDER CASE GAGES ARE AVAILABLE---MEASURE CASE LENGTH ONLY

Attributes

- Name: [L.E. WILSON 26 NOSLER/28 NOSLER CASE GAGE](#)
- Manufacturer: [L.E. WILSON, INC.](#)
- Product no.: 749017470

WILSON CASE GAGE L.E. WILSON 26 NOSLER/28 NOSLER CASE GAGE Safety Instruction Guide

Introduction

Thank you for your purchase of the WILSON CASE GAGE L.E. WILSON 26 NOSLER/28 NOSLER CASE GAGE. This product is designed to ensure precision in the reloading process, specifically for measuring headspace and overall case length. To ensure your safety and the effective use of this product, please read and follow the safety instructions outlined in this guide.

General Safety Guidelines

- Ensure safe handling of the case gage at all times.
- Use the case gage only for its intended purpose, which is to measure cartridge cases.
- Keep the gage out of reach of children and vulnerable individuals.
- Regularly inspect the gage for any signs of damage or wear before use.
- Follow all local laws and regulations regarding reloading ammunition.

Specific Safety Precautions for Use

- Always wear safety glasses when using reloading tools to protect your eyes from potential debris.
- Handle the gage with care to avoid damaging its precision components.
- Avoid using excessive force when measuring cases, as this may lead to inaccurate readings or damage to the gage.
- Do not use the case gage if it is damaged or not functioning correctly.
- Be aware of the potential for brass shavings or debris when resizing cases; keep your workspace clean.

Instructions for Installation and Usage

1. Setting Up the Gage

- Ensure that your work area is clean and welllit.
- Gather all necessary tools and materials, including a caliper for accurate measurements.

2. Measuring Headspace

- Insert the cartridge case into the gage.
- Use a caliper to measure the headspace against the gage's datum point.
- Ensure that the measurement falls within acceptable tolerances for your specific cartridge.

3. Checking Overall Length

- Place the cartridge case in the gage.
- Check the overall length to determine if trimming is necessary.
- If the case exceeds the recommended length, trim it accordingly before reloading.

4. Using the Adjustable Style for Belted Mags

- For belted magnum cartridges, ensure that the gage is properly adjusted for the unique headspace requirements.
- Monitor the shoulder area closely to prevent excessive resizing.

5. PostUse Care

- Clean the gage after each use to maintain its accuracy and longevity.
- Store the gage in a protective case to prevent damage.

Disposal Instructions

- Dispose of the WILSON CASE GAGE according to local regulations for nonhazardous waste.
- If the gage is damaged beyond repair, ensure it is disposed of in a manner that prevents injury to others.

Contact Information for Further Support

For any inquiries regarding safety or product usage, please refer to the manufacturer's contact information provided with your product packaging.

By following these guidelines, you can ensure safe and effective use of your WILSON CASE GAGE L.E. WILSON 26 NOSLER/28 NOSLER CASE GAGE. Always prioritize safety and consult professionals if you have any doubts about the reloading process.
