## Combines the Best of Two Worlds

The Berger 6mm Hybrid Target Bullet is unique in the world of rifle projectiles, thanks to a unique combination of two bullet designs seen on the market. This new hybrid bullet ensures that shooters get the most out of their long-range shot, enhancing the capability of any precision-rifle platform. The Berger 6mm Hybrid Target Bullet was designed by Berger Chief Ballistician Bryan Litz, and his unique combination provides a tangent ogive that begins as soon as the bearing surface on the projectile ends. This transitions into a secant ogive. The end result of this combination means that these rounds are much more forgiving of bullet-seating depth. True diameter: 0.243 inch Weight: 105 grains Boattail design The Berger 6mm Hybrid Target Bullet also provides an efficient shape against the wind, making for an accurate, precise projectile.
