

# BRASS CASE GAGES - L.E. WILSON 223 REMINGTON BRASS CASE GAGE

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

An upgrade to the L.E. Wilson standard steel line. Brass has good corrosion resistance and an excellent surface finish, perfect for gaging your cases. One piece gage that will check overall length to indicate the need for trimming, datum to head length to assure correct headspace and to prevent over sizing.

Available for most popular rimless cases. The Cartridge Case Gage was designed with safety in mind and was invented by our founder Sam (L.E.) Wilson in 1935 after a fellow shooter approached him for help in solving a case-separation issue. The gage allows you to see just how much you are sizing back your shoulder on your cases.

## Attributes

- Name: [L.E. WILSON 223 REMINGTON BRASS CASE GAGE](#)
- Manufacturer: [L.E. WILSON](#)
- Product no.: 749018700

# **Safety Instruction Guide for BRASS CASE GAGES**

## **L.E. WILSON 223 REMINGTON BRASS CASE GAGE**

### **Introduction**

Thank you for choosing the BRASS CASE GAGES L.E. WILSON 223 REMINGTON BRASS CASE GAGE. This guide provides essential safety instructions to ensure the safe and effective use of the product. Please read this guide carefully before use to understand the safety precautions and operational instructions.

### **General Safety Guidelines**

- Always handle the gage with care to prevent injury.
- Ensure that the gage is used in a welllit and clean environment.
- Store the gage in a safe location, out of reach of children and vulnerable individuals.
- Regularly inspect the gage for any signs of damage or wear before use.
- Follow all manufacturer recommendations and guidelines for use.
- Report any unsafe products or incidents to the appropriate authorities.

### **Specific Safety Precautions for Use**

- Use the gage only for its intended purpose: to check the overall length and headspace of 223 Remington brass cases.
- Avoid using excessive force when measuring to prevent damage to the gage and cases.
- Do not use a gage that appears to be damaged or has missing parts.
- Always wear appropriate eye protection when handling brass cases and using the gage.
- Keep hands and fingers clear of moving parts during operation.
- Ensure that the gage is clean and free of debris to avoid inaccurate measurements.

### **Instructions for Installation and Usage**

#### **1. Preparation:**

- Ensure you have a clean workspace.
- Gather all necessary materials, including the gage and brass cases.

#### **2. Using the Gage:**

- Hold the gage securely in one hand.
- Insert the brass case into the gage until it is fully seated.
- Check the overall length of the case by reading the measurement on the gage.
- For headspace measurement, ensure the case is positioned correctly against the datum point of the gage.
- If the case exceeds the recommended length or shows signs of oversizing, trim the case as necessary.

#### **3. After Use:**

- Clean the gage with a soft cloth to remove any brass residue.
- Store the gage in a protective case to prevent damage.

## **Disposal Instructions**

- Dispose of the gage responsibly at the end of its life.
- Follow local regulations for the disposal of metal products.
- Do not dispose of the gage in regular household waste.

## **Contact Information for Further Support**

- For any safety inquiries or further assistance, please refer to the manufacturer's contact information provided with the product packaging.

By following these guidelines, you can ensure a safe experience while using the BRASS CASE GAGES L.E. WILSON 223 REMINGTON BRASS CASE GAGE. Thank you for prioritizing safety and compliance with the EU General Product Safety Regulation.
