

# BRASS CASE GAGES - L.E. WILSON 260 REMINGTON BRASS CASE GAGE

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

An upgrade to the L.E. Wilson standard steel line. Brass has good corrosion resistance and an excellent surface finish, perfect for gaging your cases. One piece gage that will check overall length to indicate the need for trimming, datum to head length to assure correct headspace and to prevent over sizing.

Available for most popular rimless cases. The Cartridge Case Gage was designed with safety in mind and was invented by our founder Sam (L.E.) Wilson in 1935 after a fellow shooter approached him for help in solving a case-separation issue. The gage allows you to see just how much you are sizing back your shoulder on your cases.

## Attributes

# Safety Instruction Guide for BRASS CASE GAGES L.E. WILSON 260 REMINGTON BRASS CASE GAGE

## Introduction

Thank you for choosing the BRASS CASE GAGES L.E. WILSON 260 REMINGTON BRASS CASE GAGE. This product is designed to assist you in safely and accurately measuring your brass cases. To ensure your safety and the proper use of this product, please read and follow the guidelines outlined in this instruction manual.

## General Safety Guidelines

- Ensure that the product is used only for its intended purpose, which is to gauge brass cases.
- Always inspect the gage for any signs of damage or wear before use. Do not use if damaged.
- Keep the gage out of reach of children and vulnerable individuals.
- Store the gage in a safe and dry place when not in use.
- Report any unsafe products or incidents to the appropriate authorities.
- Check for recall updates on the EU's Safety Gate platform.

## Specific Safety Precautions for Use

- Ensure that you are wearing appropriate eye protection while using the gage.
- Handle the gage with care to avoid injury from sharp edges or points.
- Do not exceed the recommended measurements as specified in the product specifications.
- Use the gage only with compatible brass cases (specifically for 260 Remington).
- Avoid using excessive force when checking measurements to prevent damage to the gage or cases.

## Instructions for Installation and Usage

### 1. Preparation:

- Gather all necessary materials, including the brass cases you wish to measure and the gage.
- Ensure your workspace is clean and free from obstructions.

### 2. Using the Gage:

- Place the brass case into the gage, ensuring it fits snugly.
- Check the overall length of the case against the gage markings to determine if trimming is needed.
- Measure the datum to head length to ensure correct headspace. This will help prevent oversizing.
- If the case does not fit properly, do not use it for reloading.

### 3. After Use:

- Clean the gage with a soft cloth to remove any debris or residue.
- Store the gage in a protective case to prevent damage.

## Disposal Instructions

- Dispose of the product responsibly at a designated recycling facility or in accordance with local regulations.
- Do not dispose of the gage in regular household waste.

## **Contact Information for Further Support**

For any questions or concerns regarding the use of this product, please refer to the manufacturer's official contact channels for further assistance. Always ensure that you have the latest information regarding safety recalls and product updates.

Thank you for your attention to these safety instructions. Enjoy your experience with the BRASS CASE GAGES L.E. WILSON 260 REMINGTON BRASS CASE GAGE, and always prioritize safety in your reloading activities.
