

BRASS CASE GAGES - L.E. WILSON 308 WINCHESTER BRASS CASE GAGE

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

An upgrade to the L.E. Wilson standard steel line. Brass has good corrosion resistance and an excellent surface finish, perfect for gaging your cases. One piece gage that will check overall length to indicate the need for trimming, datum to head length to assure correct headspace and to prevent over sizing.

Available for most popular rimless cases. The Cartridge Case Gage was designed with safety in mind and was invented by our founder Sam (L.E.) Wilson in 1935 after a fellow shooter approached him for help in solving a case-separation issue. The gage allows you to see just how much you are sizing back your shoulder on your cases.

Attributes

Safety Instruction Guide for BRASS CASE GAGES

L.E. WILSON 308 WINCHESTER BRASS CASE GAGE

Introduction

Thank you for choosing the BRASS CASE GAGES L.E. WILSON 308 WINCHESTER BRASS CASE GAGE. This product is designed to help you ensure the accuracy and safety of your reloading process. Please read this safety instruction guide thoroughly to understand how to use the product safely and effectively.

General Safety Guidelines

- Ensure that the gage is used in a welllit and clean area to avoid accidents.
- Always handle the gage with care to prevent damage.
- Keep the gage out of reach of children and vulnerable individuals.
- Regularly inspect the gage for signs of wear or damage before use.
- Use the gage only for its intended purpose as specified in this guide.

Specific Safety Precautions for Use

- Always wear appropriate eye protection when using the gage.
- Do not exceed the recommended specifications for the cartridge being measured.
- Avoid using the gage with damaged or deformed brass cases.
- Ensure that your hands are clean and dry before handling the gage.
- If you notice any irregularities during measurement, stop using the gage and consult a professional.

Instructions for Installation and Usage

1. Preparation:

- Ensure that you have a clean and stable work surface.
- Gather all necessary tools and materials, including the brass case you wish to measure.

2. Using the Gage:

- Insert the brass case into the gage.
- Check the overall length of the case to determine if trimming is needed.
- Measure the datum to head length to confirm correct headspace.
- Observe the shoulder of the case to ensure it is sized correctly.

3. PostUse Care:

- After using the gage, clean it with a soft cloth to remove any residue.
- Store the gage in a dry place, away from moisture and direct sunlight.

Disposal Instructions

- Dispose of the gage responsibly at the end of its life cycle.
- Follow local regulations for the disposal of metal products.
- Do not dispose of the gage in regular household waste.

Contact Information for Further Support

For any safety inquiries or further assistance regarding the BRASS CASE GAGES L.E. WILSON 308 WINCHESTER BRASS CASE GAGE, please consult the manufacturer or authorized distributor.

Remember, your safety is paramount. By following these guidelines, you can ensure a safe and effective experience with your brass case gage. Thank you for your attention to these important safety instructions.
