

BRASS CASE GAGES - L.E. WILSON 6/6.5MM CREEDMOOR BRASS CASE GAGE

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

An upgrade to the L.E. Winlson standard steel line. Brass has good corrosion resistance and an excellent surface finish, perfect for gaging your cases. One piece gage that will check overall length to indicate the need for trimming, datum to head length to assure correct headspace and to prevent over sizing. Available for most popular rimless cases. The Cartridge Case Gage was designed with safety in mind and was invented by our founder Sam (L.E.) Wilson in 1935 after a fellow shooter approached him for help in solving a case-separation issue. The gage allows you to see just how much you are sizing back your shoulder on your cases.

Attributes

BRASS CASE GAGES L.E. WILSON 6/6.5MM

CREEDMOOR BRASS CASE GAGE Safety

Instruction Guide

Introduction

Thank you for choosing the L.E. Wilson Brass Case Gage for your reloading needs. This product is designed to help ensure the accuracy and safety of your ammunition by providing precise measurements of your brass cases. Please read this safety instruction guide thoroughly to understand how to use the product safely and effectively.

General Safety Guidelines

- Always read and understand the product manual before use.
- Ensure that the gage is in good working condition before each use.
- Keep the gage out of reach of children and vulnerable individuals.
- Store the gage in a safe, dry place when not in use.
- Report any unsafe conditions or product malfunctions to the appropriate authorities.

Specific Safety Precautions for Use

- Use the gage only for its intended purpose: to measure brass cases for reloading.
- Do not use the gage if it is damaged or has visible signs of wear.
- Always wear appropriate safety gear, such as safety glasses, when handling ammunition components.
- Ensure that your workspace is clean and free from distractions while using the gage.
- Avoid using the gage in wet or humid conditions to prevent corrosion.

Instructions for Installation and Usage

1. Preparation

- Ensure that your workspace is clean and welllit.
- Gather all necessary tools and materials, including your brass cases and the Brass Case Gage.

2. Measuring Overall Length

- Insert the brass case into the gage.
- Check the overall length using the markings on the gage.
- If the case exceeds the recommended length, trimming is necessary.

3. Checking Datum to Head Length

- Place the brass case in the gage, ensuring it is seated properly.
- Measure the datum to head length to verify correct headspace.
- If measurements indicate that the case is oversized, do not use it until it has been resized.

4. Assessing Shoulder Sizing

- Utilize the gage to determine how much you are sizing back the shoulder of your cases.
- Make adjustments to your resizing die as necessary to achieve desired dimensions.

5. PostUse Care

- Clean the gage after each use to remove any debris or residue.
- Store the gage in its protective case to prevent damage.

Disposal Instructions

- Dispose of the gage according to local regulations if it becomes damaged beyond repair.
- Never dispose of the gage in regular household waste if it contains hazardous materials.
- Consider recycling options available in your area for metal components.

Contact Information for Further Support

For safety inquiries or additional support regarding the L.E. Wilson Brass Case Gage, please refer to the manufacturer's contact details provided with your product packaging.

By following these safety guidelines and instructions, you can ensure the safe and effective use of the L.E. Wilson Brass Case Gage. Thank you for prioritizing safety in your reloading practices.
